ACKNOWLEDGEMENTS

First and foremost I offer my thanks to the God Almighty, for giving me strength and health during the course of this work.

I wish to express heartiest gratitude to my esteemed supervisor, Dr. Harish K. Sharma, Professor of Chemistry & Registrar, M. M. University, Mullana whose invaluable guidance enabled me to surmount all the difficulties encountered during the various phases of this work.

I am grateful to Vice Chancellor, M.M. University, Mullana and Director/Principal, MMEC, Mullana for giving me permission for achieving this task.

I also owe thanks to H.O.D. Chemistry, MMEC, Mullana and H.O.D. Chemistry, N.I.T., Kurukshetra for providing the laboratory facilities and also for their help and cooperation.

It would have been next to impossible to write this thesis without the help and cooperation of my husband Dr J.K.Kapoor, Associate Professor, N.I.T., Kurukshetra. He stood by me with unbounded affection, encouragement and patience for the completion of this work.

I also would like to make a special reference of Ms. Pernita Dogra, Assistant Professor, MMEC, Mullana who has supported and helped me throughout. My special thanks to Dr Dimple Juneja, Principal MCA Deptt. MMU, Mullana for her encouragement and support.

Unfailing love and cooperation of my sons Nipun and Pulkit was a great support for me who tolerated several evenings and sometimes days which I borrowed from them for the completion of this work.

Transcending all this, sweet love and constant inspiration of my parents, sister and other family members have made it possible to fulfil this task and a mere thanks would not suffice for it.

Thanks are also due to Mr. Yoginder and Dr. Anju Gupta for their help and support.

(NEHA VERMA)
