

LIST OF TABLES

- Table 1.1** Sugar Statistics in Maharashtra State
- Table 4.1** Waste water generation from each unit in a sugar industry
- Table 4.2.** The analyzed parameters for the study of samples
- Table 4.3** Biological oxygen demand and the nature of water sample
- Table 4.4** Phosphate-phosphorus levels and effects
- Table 4.5** Effects of chlorine on fish and aquatic organisms
- Table 4.6** Physico-chemical properties of Chopda sugar factory effluent during three years of perational period
- Table 4.7** Statistical analysis of physico-chemical parameters of Chopda sugar factory effluent
- Table 5.1** Details of ground water sampling stations in the vicinity of Chopda sugar factory.
- Table 5.2** Ground water quality parameters and method used for their analysis:
- Table 5.3** Some recommended alkalinity values
- Table 5.4** Details of soil sampling stations in the vicinity of Chopda sugar factory
- Table 5.5** Categories of soil as per their EC values
- Table 5.6** Physico-chemical properties of soil irrigated with spentwash (at S1 to S3) and ground water (at S4 to S7) within six km area of Chopda sugar factory during study period
- Table 6.1** Soil cellulase activity (μg glucose/g soil/h) in soil at different proportion of spentwash and duration of incubation
- Table 6.2** Soil dehydrogenase activity (μg TPF/g soil/day) in soil at different proportion of spentwash and duration of incubation
- Table 6.3** Soil phosphatase activity (μg PNP/g soil/hr) in soil at different proportion of spentwash and duration of incubation
- Table 6.4** Soil urease activity (μg $\text{NH}_4^+\text{-N}$ /g soil/day) in soil at different proportion of spentwash and duration of incubation
- Table 7.1** Number of nematodes in soil at various depths collected from seven samples sites during three years of study in six km area of Chopda sugar factory
- Table 7.2** Variation in number of nematodes in soil treated with various proportion of spentwash

LIST OF PHOTOGRAPHS

Figure 1.1 Sugar Map of India (Source: www.vsisugar.com)

Figure 1.2 Seven sugar producing regions in Maharashtra

Figure 1.3 District wise % contribution in total sugar production of Maharashtra

Figure 4.1 Sugar process flow chart

Figure 4.2 Map of Maharashtra showing Chopda Sugar Factory

Figure 4.3 Satellite Image of Chopda Sugar Factory

Figure 5.1 Satellite Image of Chopda Sugar Factory (shown in red circle), seven
sampling sites within 6 km area

LIST OF FIGURES/GRAPHS

- Figure 5.1** Fluctuations in temperature ($^{\circ}\text{C}$) of water samples during three years of study
- Figure 5.2** Variations in pH of water samples during three years of study
- Figure 5.3** Variations in EC values of water samples during three years of study
- Figure 5.4** Variations in Turbidity (NTU) values of water samples during study period
- Figure 5.5** Variations in dissolved oxygen (mg/L) values of water samples during three years of study period.
- Figure 5.6** Variations in Biological oxygen demand (mg/L) of water samples during three years of study period.
- Figure 5.7** Variations in Chemical oxygen demand (mg/L) of water samples during three years of study period.
- Figure 5.8** Histogram showing variations in Hardness (due to Ca and Mg in mg/L) of water samples during three years of study period.
- Figure 5.9** Variations in Total dissolved solids (mg/L) in water samples during three years of study period
- Figure 5.10** Fluctuations in Alkalinity (mg/L) of water samples during three years of study period.
- Figure 5.11** Variations in Phosphates content (mg/L) in water samples during three years of the study period.
- Figure 5.12** Variations in Phosphates content (mg/L) in water samples during three years of the study period.
- Figure 5.13** Fluctuations in Chloride content (mg/L) in water samples during three years of the study period.
- Figure 5.14** Fluctuations in Nitrate content (mg/L) in water samples during three years of the of study period
- Figure 5.15** Variations in Magnesium content (mg/L) in water samples during three years of study period.

ABBREVIATIONS

APHA	American Public Health Association
BIS	Bureau of Indian Standard
BOD	Biological Oxygen Demand
CPCB	Central Pollution Control Board
COD	Chemical Oxygen Demand
DO	Dissolved Oxygen
DDT	Dichlorodiphenyl Trichloroethane
ETP	Effluent Treatment Plant
FAO	Food and Agriculture Organization
GIS	Geographical information system
GPS	Global positioning system
ISMA	Indian Sugar Mills Association
MLD	Million liters per day
MPCB	Maharashtra Pollution Control Board
MSL	Mean Sea Level
MW	Mega Watt
NFCSF	National Federation of Cooperative Sugar Factories
NEERI	National Environmental Engineering Research Institute
NTU	Nephelometer turbidity unit
PCB	Polychlorinated Benzene
pH	Potential Hydrogen
PPM	Parts per million
TA	Total Alkalinity
TDS	Total Dissolved Solids
TH	Total Hardness
VSI	Vasantdada Sugar Industry
WHO	World Health Organization
WWF	World Wide Fund
