ACKNOWLEDGEMENT

In the name of God, most Gracious and most Merciful.

Firstly, I am thankful to Almighty God for giving strength to carry out the present work. Words are inadequate and out of place at times particularly in the context of expressing sincere feelings in the contribution of this work, is no more than a mere rituals. It is my privilege to acknowledge with respect & gratitude, the keen, valuable and ever-available guidance rendered to me by Dr. Dimple Juneja, Professor and Head, Computer Science and Engineering, Director, Technology Education and Research Integrated Institutions, Kurukshetra, Haryana (India) for constant encouragement, enthusiastic supervision, kind and noble guidance of this work. Acknowledging to her in words is very difficult.

During my research I faced so many obstacles but every time her constant motivation, support and encouragement gave me the strength to look forward. The words are not enough to express my deep sense of gratitude for her all time availability, worthy suggestions, constructive criticism and to give up commitment for the completion of this work. I can say straight that the completion of this thesis is impossible without her attention. Without the wise counsel and able guidance, it would have been impossible to complete the thesis in this manner.

Further, this research work has been a truly life-changing experience for me and it would not have been possible to do without the support and guidance that I received from many people.

I would like to express my whole hearted thanks to Dr. Anil Kumar Kapil, Professor, HCTM, Kaithal and Ex. Professor and Principal of MMICT&BM (MCA), Mullana, for their sincere help, support, suggestions and timely help. His advice and willingness has always been very fruitful for shaping up my ideas and research.
I avail this opportunity, to pay my obeisance to my loving Parents for their Love, affection and encouragement at every step of my life. It is the fruit of their blessings, that I had reached this milestone. At this juncture, I also remember my loving sisters and brother for their affection, care and moral support. It is also my pleasing privilege to remember my in-law’s family for their affectionate support and constant inspirations.

My special love and blessings to my son, Akshit, for tolerating me whenever I had been annoyed while working and his wait to sleep for late night. His endless love, priceless, perpetual support and everything made all this possible.

Finally, I would like to acknowledge the most important person in my life – my wife Nidhi. She has been a constant source of strength and inspiration. I can honestly say that it was only her determination and constant encouragement that ultimately made it possible for me to see this research work through to the end.

I would like to express Collective and individual acknowledgments to my colleagues and friends whose presence was somehow perpetually refreshing, helpful, and memorable.

“Experience is not what happens to a man, it is what a man does with what happens to him.”
