ACKNOWLEDGEMENTS

Words are not enough to express my deep gratitude to my revered teacher, philosopher, and guide, Prof. L.S. Chawla who has been a constant source of inspiration and a tower of strength throughout the trials and tribulations which went into the writing of this dissertation. Inspite of his very busy schedule and indisposition, he has personally conducted and supervised all the advanced investigative procedures. The imprint of his caliber can be found in the pages which follow.

I take this opportunity to thank Dr. R.L. Narang, Prof. and Head, Deptt. of Psychiatry, who has guided the psychological aspects of my thesis. In the same vein, my heartful thanks are due to Dr. R.V.R. Malhotra, Sr. Lecturer, Deptt. of Psychiatry who has painstakingly helped me to collate, analyse and interpret the psychological data. Without his help, I would surely have ended up in their words.

I would be failing in my duty if I do not acknowledge with deep humility my sincere gratitude to Dr. S.B. Khurana, Prof. of Medicine and Medical Superintendent, who has been a constant source of inspiration and encouragement to me.
Dr (Mrs) Rekha Goyal, Prof. and Head, Deptt. of Radiology was of great assistance in reporting the barium series. I extend my thanks to her.

I would like to place on record the healthy criticism and invaluable help by Dr. Nitin Mehta, Asstt. Prof. of Medicine, which went a long way in preparing this manuscript.

I am also highly indebted to Dr. Rajeev Gupta, Sr. Lecturer of Psychiatry, who did the tedious job of mental examination of majority of my patients.

To my dear friends, Mr. Devinder and Dr. P.K. Jain, I am deeply grateful for their kind help in preparing this monograph.

Lastly but not least, I would like to thank Mr. Balsew Singh who typed my thesis with great patience.

Before ending my list, I would extend thanks from the core of my heart to all the patients who bore the deep investigations with great fortitude and courage.

Jagjit S. Rattan
