LIST OF TABLES

Table No	CONTENT	Page
1.	Reliability Coefficiante for various tests	116
2.	Comparison of high average and low achievers on Cognitive Variables	137
3.	Correlation between Academic Achievement and Cognitive Variables.	139
4.	Pathway Analysis of the contribution of cognitive variables to Academic Achievement	140
5.	Summary of Analysis of various of School Marks in relation to social factors.	174
6.	The Means of the school marks in relation to social factors.	175
7.	Comparision of different educational classes and Academic Achievement.	176
8.	Comparison of Mean marks of different caste pupils.	177
9.	Comparison of mean marks of different socio-economic status.	178
10.	Comparison of Mean Marks of Different Alienation Groups.	179
11.	Comparison of Different Categories in Relation to Sex and Caste.	180
12.	Comparison of Different Categories in Relation to Sex and Socio economic Status.	181
13.	Comparison of Different Categories on Academic Achievement in Relation to Educational class and caste.	182
14.	Comparison of Different Caste on Academic Achievement at Different Pupils among Scheduled Caste Scheduled Tribe pupils	184
15.	Comparison of Different Categories in Relation to Educational Class and Rural-Urban Background.	186

16. Comparison of High, Average and Low Achievers on Socio-economic status. 187

17. Comparison of High, Average and Low Achievers on Alienation. 188

18. Comparison of monolinguals with Bilingual Groups and Trilingual Groups on academic achievement. 189

19. Comparison of Bilingual Groups with one another on academic achievement. 190

20. Comparison of Bilingual Groups with Trilingual Groups 191

21. Comparison of monolinguals, Bilinguals an Trilinguals on academic achievement. 192

22. Attitude profiles of the High Average and Low Achievers. 199

23. Comparison of Distance Between High, Average and Low Achiever with regard to Meaning attributed by then to the concepts. 200

24A. Summary of Analysis of variance of Academic Achievement of pupils belonging to different climate schools. 211

24B. Means relating to Academic Achievement occuring under different climates. 211

25. Comparison of Academic Achievement of pupils studying in different school climates. 212

26. Comparison of High, Average and Low Achievers on the Personality traits. 230

27. Correlation between Academic Achievement and Personality Factors. 235

28. Comparison of High, Average and Low Achievers on the Personality Dimension. 236

29A. Summary of Analysis of Variance Academic Achievement with reference to Personality Dimensions. 237

30. Comparison of Academic Achievement among high Middle and Low Groups on Neuroticism. 239

31. Means relating to interaction effect between Extraversion and Psychoticism on academic Achievement. 238

32. Correlation between Academic Achievement and Personality Dimension. 240

29B. High, Middle and Low Groups on the Personality Dimensions. 238

33. Inter correlations among the variables obtained in the case of High Achievers. 256

34. Intercorrelations among the variables obtained in the case of Average Achievers. 257

35. Inter correlations among the variables obtained in the case of Low Achievers. 258

36. Principle Component Factor Matrix obtained in the case of High Achievers. 259

37. Principle Component Factor Matrix obtained in the case of Average Achievers. 260

38. Principle Component Factor matrix obtained in the case of Low Achievers. 261

39. Varimax Rotated Factor matrix obtain d in the case of High Achievers. 262

40. Varimax Rotated Factor matrix obtained in the case of Average Achievers. 263

41. Varimax Rotated Factor Matrix obtained in the case of Low Achievers. 264
