

# Acknowledgements

It would have been impossible to complete my thesis without the guidance of my supervisors, and without the help and support from my family and friends.

I would like to express my gratitude to my sir, Dr. Kshitish Acharya, for his guidance and patience, all through my Ph.D. tenure. Most of my work was done at IBAB under his guidance. He gave me an immense support and encouragement both professionally and personally, and I cannot think of another guide other than him. And, I firmly believe that my dream of pursuing Ph.D. would have been a dream without his help. His guidance helped me at all times, and his teachings motivated me always, which made me enjoy science and research more.

I would like to thank my guide Prof. Abhijit Mitra for his support and inputs. I do extend my thanks to all the teachers of IBAB and IIIT-H, who strengthened my knowledge in various bioinformatics domains.

I would extend my gratitude to the director of IBAB, Dr. Yathindra, for providing me a wonderful platform to do my Ph.D.

Undoubtedly, my family members played an important role all through these years. They have been supportive and encouraged me to fulfill my dreams. In particular, I must acknowledge my husband because without his help, understanding and encouragement, it would have been impossible to complete this thesis.

I would like to thank my friends Darshan, Govind, Sravanthi, and Akhilesh for their assistance in increasing my skills. I like to convey my thanks to all my other friends, with whom I had a lot of scientific and other discussions. Your company made my learning complete and the fun we had I cherish the most.

I relished and will relish each moment I spent at IBAB and IIIT-H, and I thank the academic, non-academic, and administrative staff of both the institutes for their constant support and patience.
