Acknowledgements

This thesis is the end of my journey in obtaining my Ph.D. I have not travelled in a vacuum in this journey. This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and my family members. At the end of my thesis, I would like to thank all those people who made this thesis possible and an unforgettable experience for me.

First of all, I am extremely grateful to my research guide, Dr. Kapil Gupta, Assoc. Professor, Department of Electronics & Communication Engineering, M.M. Engineering College, M.M. University, Mullana, for his valuable guidance, scholarly inputs and consistent encouragement, I received throughout the research work. This feat was possible only because of the unconditional support provided by him.

I am also extremely indebted to my guide Dr. Dushyant Gupta, Professor, Electronics Department, University College, Kurukshetra University, Kurukshetra, for providing necessary resources to accomplish my research work. I am very much thankful to him for picking me up as a student of Ph.D. I warmly thank him, for his valuable advice, constructive criticism and his extensive discussions around my work.

I gratefully acknowledge Dr. V. Katiyar, Principal, M. M. Engineering College, M. M. University for his understanding, encouragement and personal attention which have provided good and smooth basis for my Ph.D. tenure and also for providing necessary infrastructure and resources to accomplish my research work.

I pay my homage to Dr. H. P. Sinha who had left the college due to some health problem and age. He has supported me in many ways when he was here and also after leaving the University. His constant support is extremely helpful for me.

No research is possible without the Library, the centre of learning resources. I take this time to express my gratitude to all the library staff for their services. I appreciate the
interest shown by them in updating me with the latest publications on my research topic.

My colleagues have all extended their support in a very special way and I gained a lot from them, through their personal and scholarly interactions, their suggestions at various points of my research programme. I am highly thankful to them.

I would like to express appreciation to my beloved wife who spent sleepless nights with and was always my support in the moments when there was no one to answer my queries. I am very much indebted to my daughter and son, who supported me in every possible way to see the completion of this work. Without their moral support I am unable to complete this work.

Above all, I owe it all too almighty God for granting me the wisdom, health and strength to undertake this research task and enabling me to its completion.
