Acknowledgement

This thesis is the end of my journey in pursuing my degree of Doctor of Philosophy (Ph.D.). The completion of this wonderful journey is possible only because of support and encouragement of many people including my teacher, my friends, colleagues, students, my family and various institutions. I would like to thank everyone who made this work possible and an unforgettable experience for me. At the end of my thesis, it is a pleasant task to express my thanks to all who contributed in many ways for the successful completion of this work. At the outset, I would like to thank god for giving me the strength to achieve my dreams and guiding me through this extraordinary journey.

At this moment, first of all I would like to thank my guide and mentor, Dr Satish Kumar Adiga. I am very much thankful to him for picking me as a Ph.D. student. Sir, you have been a tremendous mentor for me and I would like to thank you for your valuable advice, encouraging my research and allowing me to grow as a research scientist. You are a great scientist, a wonderful human being and this work would not have been possible without your guidance and support. Under your guidance, I successfully overcame many difficulties and developed my professional and personal skill. Your advice on both research as well as on my career have been priceless and your advice will help me nurture my future. I would like to thank you from bottom of my heart and dedicate this thesis to you.

I am extremely indebted to my co-guide Dr. Guruprasad Kalthur for his valuable advice, constructive criticism and his extensive discussion during the work. Sir, I would like to thank you for making me organized student from an unorganized one. Whenever, I needed any technical support or any assistance during my work, you were always there to help me. I am deeply thankful to you and you keep a very special position in my life.

I am also extremely thankful to my co-guide Dr. Pratap Kumar for his expert advice and involvement in this project. Sir, your interests towards students and research are incredible. I am thankful for your encouragement and personal attention toward improving my work during my work.
I will forever be thankful to Dr. Pradeep Kumar, Dean and member of Doctoral Advisory Committee (DAC), Kasturba Medical College for providing necessary infrastructure and facility to accomplish my research work. I would also like to thank you for your critical analysis and valuable suggestions during my Ph.D presentation.

My sincere thanks must also go to the external Doctoral Advisory Committee (DAC) member, Dr R. S. Sharma, Scientist-F & Deputy Director General (SG), Division of Reproductive Health and Nutrition, Indian Council of Medical Research (ICMR), India. Sir, you have offered me valuable comments toward improving my work and provided me constructive criticism which helped me develop a broader perspective to my thesis.

Special mention and thanks are due to Mr. Sujit Raj Salian, for his support during sample collection for this study. This work would not have possible because of technical support provided by him during the analysis of study parameters and I would be thankful to him forever for his constant support.

I am also very thankful to Ms. Shubhashree and Mrs. Sandhya, Lecturers, Division of Clinical Embryology, Kasturba Medical College for their help in the study parameters of this study.

My heartfelt thanks to Mr. Shyam PS, my friend and classmate for helping and encouraging me in the beginning of my Ph.D. work.

I also acknowledge the help provided by Ms. Fiona D’Souza, Mr. Sachin Hongutikar, Mrs. Ramya Nair, Mr. Guruprasad, Research Scholars, for their constant support and encouragement during the study.

I am really very thankful to Mrs. Jayalaxmi Pai, Mrs Keerthi G. Patil and Ms. Anita Poojari, who has helped me immensely during the entire project work and their support is sincerely acknowledged.

I expand my thanks to Mr. Farid, Ms. Cheryl and Ms. Jeena, my post-graduate embryology juniors, for their encouragement during the beginning of this study.

I would also like to thank Ms. Rohini, Ms. Sangeetha, Ms. Jemey, Ms. Aditi, Ms. Sherine, Ms. Freya, Mr. Yuvraj, Mr. Shirish, Mr. Vikram, Ms. Shruthi, Mr. Sam,
Ms. Jency, Ms. Carol, Ms. Aarti, Ms. Shilly, Ms. Yeshaswini, Mr. Shahin and Ms. Anusha, former post-graduate students of Clinical Embryology for their support during the entire thesis work.

I also acknowledge the help and cooperation extended by Ms. Pooja, Ms. Bageshree, Ms. Soorya, Mr. Deepak, Mr. Tobin and Mr. Harshith, Final year post-graduate Embryology students of Clinical Embryology during the project work.

I would also like to thanks Dr. Satish Rao, Professor and HOD, Department of Radiobiology, for his critically analysing the study outline and providing valuable suggestions during the study.

My heartfelt thanks to Dr. Hanumanthappa Krishnamurthy, National Science of Biological Sciences (NCBS), Bangalore, to carry out part of my study parameters at his laboratory.

I would also like to thanks Dr. Pragya Rao, HOD, Dr. Nalini Khandige and Dr. Gopalakrishna Kodyalamoole, Professor, Department of Biochemistry, Kasturba Medical College, Manipal, for allowing and helping me during the analysis of study parameters.

I am very thankful to Dr. Srinivas Challapalli, Radiation Safety Officer (RSO), Kasturba Hospital, Mangalore and Mr. Srinidhi Chandraguthi, RSO, Kasturba Hospital, Manipal for providing me details of the radiation exposed subjects and making this study possible.

I would also like to acknowledge the help from Directors and medical superintendent of various hospitals, who has supported this study and permitted their radiation exposed staff to actively participate in this study.

I take this opportunity to sincerely acknowledge the Indian Council of Medical Research (ICMR), Government of India, New Delhi, for providing financial support to perform this interesting work comfortably.

I would also like to thank Dr. Asha Kamath, Associate professor, Department of Community Medicine, Kasturba Medical College, Manipal, for her expert statistical
advice in data analysis. In addition, I would like to acknowledge the help from Department of Biostatistics, Manipal University, Manipal for the valuable suggestions during the data analysis.

I cannot forget my friends Mr. Premjit Bhakat, Mr. Snehil and Ms Dinesh Kumari Sharma, who went through hard times together, cheered me on, and celebrated each accomplishment during this study. I am very thankful for their support and encouragement.

It’s my fortune to gratefully acknowledge the support of some special individuals. Words fail me to express my appreciation and my heartfelt thanks to volunteers who willingly and selflessly donated samples for this study during my research endeavor. This study would not have been possible without the help of these volunteers.

I deeply thank my parents and family for their unconditional trust, timely encouragement, and endless patience. It was their love that raised me up again when I got weary. They have also been generous with their love and encouragement despite the long distance between us.

Finally, I thank with love to my wife for her concern and moral support during this study. She helped me to get through this agonizing period in the most positive way.
