

## LIST OF PLATES

Plate. No	Title	PageNo
Plate 1	Rice plant showing different stages of sheath blight symptoms.	53
Plate 2	Culture of <i>Rhizoctonia solani</i> on PDA	54
Plate 3	Culture of <i>Rhizoctonia solani</i> with sclerotia	60
Plate 4	Dual culture with <i>Trichoderma</i> against <i>Rhizoctonia solani</i>	77
Plate 5	Scanning Electron Microscope observation of the mycelial interactions of the <i>Trichoderma</i> spp. and <i>Rhizoctonia solani</i> in dual culture	79
Plate 6	Phosphate solubilization by strains of <i>Trichoderma</i> spp. and <i>Aspergillus niger</i>	81
Plate 7	Chitin solubilization by <i>Trichoderma</i> spp.	83
Plate 8	Overview of rice field plot employed to test the efficacy of biocontrol agents	91
Plate 9	Filed plot treated with <i>Trichoderma harzianum</i> 12	92
Plate 10	Field plot inoculated with <i>Rhizoctonia solani</i> – control	93
