

# List of Figures

---

Figure No	Description	Page No
Fig 2 1	Illustration of transformation of an image from Cartesian coordinates to polar coordinates	35
Fig 2 2	Block diagram of the proposed polar-eigenspace based face recognition system	38
Fig 2 3	Face recognition performance of the proposed <i>polar-eigenspace</i> method	40
Fig 2 4	Face recognition performance of the 2D-PCA method	40
Fig 2 5	Different illumination conditions of facial images of the same individual	41
Fig 2 6	Block diagram of Proposed System	46
Fig 2 7	An original image and its equivalent MSR image	46
Fig 3 1	Recognition accuracy of SIFT-FLD for AT&T face database	63
Fig 3 2	Recognition accuracy of SIFT-FLD for CALTECH face database	64
Fig 3 3	Original Image, log-Gabor Image, Energy image and orientation image	69
Fig 3 4	Subset of one subject of AT&T face database	70
Fig 3 5	Recognition accuracy of the proposed model and other techniques on AT&T face data base	71
Fig 3 6	Subset of one subject of YALE face database	71

Fig 3 7	Recognition accuracy of the proposed model and other techniques on YALE face database	72
Fig 4 1	An illustration of a face LEM	77
Fig 4.2	Face image and its Canny edges	79
Fig 5 1	Discriminative Fractional DCT based model	101
Fig 6 1	Recognition accuracy of the proposed model and other techniques on AT&T face database	116
Fig 6 2	Recognition accuracy of the proposed model and other techniques on YALE face database	117
