At times our own light goes out and is rekindled by a spark from another person. Each of us has cause to think with deep gratitude of those who have lighted the flame within us.

-- Albert Schweitzer

The expressivity of words looses significance when we search for an appropriate sentence of gratitude and obligation since the acknowledgement is the only part of research work which is having no guidance. Each and every event, either small or big in nature is itself a new creation. As one flower makes no garland, this research work would not have been fulfilled and reaped as a healthy fruit without the whole hearted encouragement, faith and active involvement of my mentors, friends and well wishers.

I would like to acknowledge the continuous encouragement and help extended to me by my sole guide Dr. Girish K Jani, Principal, SSR College Of Pharmacy, Silvassa for preparing this thesis. He has been my sole guide and philosopher throughout the period of my work for providing spontaneous support and expert guidance to me. His extensive knowledge in this subject
and the way he impart the same to me has enabled me to develop the thesis in a cohesive manner and kindled within me a passion for the subject.

The completion of this work would not have been possible without the Doctorate Progress Committee (DPC) members: Dr. Vishnu A. Patel, PG co-coordinator, A.R College of Pharmacy and Dr. Jayvadan Patel, Principal, Nootan College Of Pharmacy. I am really thankful for their rigorous examinations and precious suggestions during my research.

I am gratefully indebted to Dr. Dhiren Shah, Principal of Vidyabharti Trust College of Pharmacy and Mr. Jagdishbhai Patel, Trustee of Vidyabharti Trust Campus for their persistent countenance bestowed upon me. Without his help, it would have been an uphill task for me to reach this summit.

I express my special thanks to Alembic Research Center, for providing me the drug Candesartan Cilexetil. I would like to thank Gattefosse, France, Abitec Corp., USA and Evonik-Degussa, Germany and Gangwal Chemicals for providing me the gift samples for various excipients. I would like to thank MS University and SPARC, Baroda for allowing me to perform various characterizations.
My sincere thanks to my Mom and DAD to whom this thesis is dedicated; whose moral support has been always showered upon me at all steps and walk of my journey throughout life and granting me the excessive support at all the stages of life. May I worthy of their cause and repose of their faith have constantly inspired me to do my best with hidden potentials. I am greatly indebted to them in my life.

Last but not least I thank “GOD” who has patronized me with consciousness and love to ladder the success.

Jill Shukla
