

## **ACKNOWLEDGMENTS**

I feel great pleasure in expressing my deep sense of gratitude and respect for my guide **Dr. L. Rupachandra Singh**, Professor & Head, Department of Biochemistry, Manipur University, Canchipur, Imphal, Manipur for his strict insightful guidance, scientific supervision, constant encouragement and constructive criticism during the various stages of the research work. I will forever remain indebted to him for inculcating scientific frame of mind and meticulous thinking and planning in performing research work.

I also extend my esteemed regard and sincere thanks to my co-guide **Dr. S. Kunjeshwori Devi**, Associate Professor, Department of Biochemistry, Manipur University for her valuable guidance and supervision and ever ready helping attitude during the course of investigations.

I also wish to thank **Dr. H. Devendra**, Visiting Faculty and **Dr. Debananda S. Ningthouja**, Associate Professor, Department of Biochemistry, Manipur University for their encouragement during the course of study.

I also express my heartfelt thanks to **S. Jibankumar**, **S. Sunil Singh**, **H. Ruli Devi**, **M. Sobhaschandra**, Research Scholars of the Department of Biochemistry, Manipur University for their kind co-operation and informative suggestions during the research work. My thanks also go to the non-teaching staffs of the Department of Biochemistry for their generous help and co-operation.

I am thankful to the patients and volunteers for their co-operation without whom this work would have been incomplete.

I would also like to offer my sincere thanks to Dr. Paul Dkhar, Scientific Officer, and Mrs. Clarice, Sr. Technical Assistant, of the Sophisticated Analytical Instrument Facility, North-eastern Hill University, Shillong, for providing laboratory facilities for Atomic Absorption Spectrophotometry which were required during the course of research.

I sincerely thank Dr. Ak. Brogen, Associate Professor, Department of Social and Preventive Medicine, RIMS, Imphal, for his valuable help in statistical analysis.

I will always remain indebted to my husband Dr. Th. Nandakishore, who always stood by me at difficult and challenging situations to motivate and encourage me enabling me to tirelessly pursue my research. I also appreciate the understanding of my loving children Daniel and Nelson for missing out many days of maternal care during the course of my research work. I also thank my parents, brothers, sisters and family members for their love, encouragement and support all throughout my research period.

Above all, I thank God for giving me wisdom, strength and good health which has helped me to complete my research work.
