CHAPTER – I : INTRODUCTION	1 – 10
1.1. Arachidonic acid pathway	1
1.1.1. Phospholipase A ₂ s and other metabolites	2
1.1.2. Cyclooxygenase and their metabolites.	4
1.1.3. Lipoygenase and their metabolites	5
1.2. Role of AA pathway in Inflammation and Inflammation and Cancer	6
1.2.1. Roles of PLA ₂ s and other metabolites in Inflammation and Cancer	7
1.2.2. Roles of COXs and their metabolites in Inflammation and Cancer	8
1.2.3. Roles of LOXs and their metabolites in Inflammation and Cancer	10
CHAPTER – II REVIEW LITERATURE	11 - 52
2.1. Apigenin	11
2.2. Anthocyanins	13
2.3. Baicalein	16
2.4. Berberine	18
2.5. Curcumin	20
2.6. Diallyl sulfide	24
2.7. Ellagic acid	25
2.8. Epigallocatechin gallate	26

2.9.	Eugenol	27
2.10.	Fisetin	30
2.11.	Garcinol	30
2.12.	Genistein	31
2.13.	[6]-Gingerol	33
2.14.	Guggulsterone	33
2.15.	Indole-3-carbinol	34
2.16.	Lycopene	35
2.17.	Nordihydroguaiaretic acid	36
2.18.	Piperine	38
2.19.	Quercetin	39
2.20.	Resveratrol	40
2.21.	Silibinin	44
2.22.	Sulforaphane	45
2.23.	Thymoquinone	46
2.24.	Triptolide	47
2.25.	Ursolic acid	48
2.26.	Wogonin	50
2.27.	Others	51

CHAPTER – III : *IN VITRO* SCREENING OF SELECTED MEDICINAL PLANT EXTRACTS FOR ARACHIDONIC ACID METABOLIZING ENZYMES (PLA₂, COX AND 5-LOX) INHIBITORY ACTIVITY 54 - 75

3.1.	AIM AND OBJECTIVE	54
3.2.	INTRODUCTION	54
3.2.1.	<i>Abrus precatorius</i> Linn.	55
3.2.2.	<i>Madhuca longifolia</i> Linn.	55
3.2.3.	<i>Helicteres isora</i> Linn.	56
3.2.4.	<i>Borassus flabellifer</i> Linn.	57

3.2.5. <i>Punica granatum</i> Linn.	58
3.2.6. <i>Cocos nucifera</i> Linn.	58
3.2.7. <i>Feronia limonia</i> Linn.	59
3.3. MATERIALS AND METHODS	60
3.3.1. Chemicals	60
3.3.2. Plant material	60
3.3.3. Preparation of plant extract	61
3.3.4. Arachidonic Acid Metabolizing Enzymes Inhibition Studies	61
3.3.4.1. <i>In vitro</i> Phospholipase A2 assay	61
3.3.4.2. <i>In vitro</i> 5-lipoxygenase assay	61
3.3.4.3. <i>In vitro</i> cyclooxygenase 1 and 2 assays	62
3.3.5. STATISTICAL ANALYSIS	62
3.4. RESULTS	63
3.4.1. Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX-1, COX- 2 and 5-LOX) of various parts of selected medicinal plants	63
3.4.1.1. Effect of <i>Abrus precatorius</i> inner part of seed coat on Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX-1, COX-2 and 5-LOX)	63
3.4.1.2. Effect of <i>Madhuca longifolia</i> leaf and seed coat on Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX- 1, COX-2 and 5-LOX)	65
3.4.1.3. Effect of <i>Helicteres isora</i> L. stem bark and fruit pericarp on Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX-1, COX-2 and 5-	65

	LOX)	
3.4.1.4.	Effect of various parts of <i>Borassus flabellifer</i> on Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX-1, COX-2 and 5-LOX)	66
3.4.1.5.	Effect of <i>Punica granatum</i> Fruit rind on Arachidonic Acid Metabolizing Enzymes Inhibitory Activities (PLA2, COX-1, COX-2 and 5-LOX)	68
3.4.1.6.	Effect of <i>Cocos nucifera</i> fiber husk and tender seed coat on arachidonic acid metabolizing enzymes inhibitory activities (PLA2, COX-1, COX-2 and 5-LOX)	69
3.4.1.7.	Effect of <i>Feronia limonia</i> leaf and fruit on arachidonic acid metabolizing enzymes inhibitory activities (PLA2, COX-1, COX-2 and 5-LOX)	70
3.5.	DISCUSSION	74
3.6.	CONCLUSIONS	75
CHAPTER IV:	5-LOX ASSAY-GUIDED ISOLATION AND IDENTIFICATION OF DAMMARANE TRITERPENOID 1 FROM <i>BORASSUS FLABELLIFER</i> L. SEED COAT	76 – 87
4.1.	AIM AND OBJECTIVES	76
4.2.	INTRODUCTION	76
4.3.	MATERIAL AND METHODS	78
4.3.1.	Chemicals	78
4.3.2.	Collection of plant material	78

4.3.3. Extraction	78
4.3.4. Isolation and Identification of Bioactive Compound from <i>B. flabellifer</i> Seed Coat	79
4.3.6. Analytical techniques	79
4.3.6.1. Silica gel column chromatography	79
4.3.6.2. Thin layer chromatography	79
4.3.6.3. Melting point	80
4.3.6.4. Liebermann-Burchard test for terpenoids:	80
4.3.6.5. HPLC	80
4.3.6.6. NMR	80
4.3.6.7. MS	80
4.3.6.8. Elemental analysis specifications	80
4.4. RESULTS AND DISCUSSION	80
4.4.1. 5-LOX Assay Based Isolation of Dammarane Triterpenoid 1 From <i>B. flabellifer</i> Seed Coat Extract	80
4.4.2. Structural elucidation of dammarane triterpenoid 1 using advance spectroscopic techniques	85
4.5. CONCLUSIONS	87
CHAPTER – V : IN VITRO AND IN SILICO STUDIES OF DAMMARANE TRITERPENOID 1 ON ARACHIDONIC ACID PATHWAY METABOLIZING ENZYMES	88 – 96
5.1. AIM AND OBJECTIVES	88
5.2. INTRODUCTION	88
5.3. MATERIALS AND METHODS	90
5.3.1. Chemicals	90
5.3.2. Arachidonic acid metabolizing enzymes inhibitory studies	90

5.3.2.1. <i>In vitro</i> phospholipase A2 assay	90
5.3.2.2. <i>In vitro</i> 5-lipoxygenase assay	90
5.3.2.3. <i>In vitro</i> cyclooxygenase 1 and 2 assays	90
5.3.3. Molecular docking studies	91
5.4. RESULTS AND DISCUSSION	91
5.4.1. 5-LOX AND COX dual inhibitory activities of isolated dammarane triterpenoid 1 <i>in vitro</i>	91
5.4.2. Molecular docking studies (<i>in silico</i>) of isolated dammarane triterpenoid 1 on 5-LOX and COX crystal proteins	94
5.5. CONCLUSIONS	96
CHAPTER – VI : ANTI-INFLAMMATORY STUDIES OF COX AND 5-LOX DUAL INHIBITORY DAMMARANE TRITERPENOID 1	97 – 108
6.1. AIM AND OBJECTIVES	97
6.2. INTRODUCTION	97
6.3. MATERIALS AND METHODS	99
6.3.1. Chemicals and reagents	99
6.3.2. <i>In vivo</i> anti-inflammatory activity by carrageenan induced rat paw edema model	99
6.3.3. Estimation of TNF- α , IL-1 β and IL-6 secretion levels in LPS induced THP1 human monocytes	100
6.3.4. Quantification of Leukotriene B4	101
6.3.5. Quantification of Prostaglandin E ₂	101
6.3.6. Statistical analysis	102
6.4. RESULTS	102
6.4.1. <i>In vivo</i> carrageenan-induced paw edema inhibition activity of isolated dammarane triterpenoid 1 in rats	102

6.4.2.	Histopathological analysis	103
6.4.3.	Effect of dammarane triterpenoid 1 on production of PGs in LPS induced THP-1 human monocytes	104
6.4.4.	Effect of dammarane triterpenoid 1 on production of LTs in LPS - induced THP-1 human monocytes	104
6.4.5.	Effect of dammarane triterpenoid 1 on TNF- α secretion in LPS - induced THP-1 human monocytes	105
6.4.6.	Effect of dammarane triterpenoid 1 on secretion of IL-1 β in LPS - induced THP-1 human monocytes	106
6.4.7.	Effect of dammarane triterpenoid 1 on secretion of IL-6 in LPS - induced THP-1 human monocytes	107
6.5.	DISCUSSION	107
6.6.	CONCLUSIONS	108

CHAPTER VII : ANTIPROLIFERATIVE AND PRO-APOPTOTIC STUDIES OF COX AND 5-LOX DUAL INHIBITORY DAMMARANE TRITERPENOID 1 ON MIA PACA-2 PANCREATIC AND DU145 PROSTATE CANCER CELL LINES 109 - 136

7.1.	AIM AND OBJECTIVES	109
7.2.	INTRODUCTION	109
7.3.	MATERIALS AND METHODS	112
7.3.1.	Chemicals and reagents	112
7.3.2.	Preparation of compound for anticancer studies	112
7.3.3.	Cancer cell lines	112
7.3.4.	Cell proliferation by MTT assay	113

7.3.5. Cell cycle analysis	113
7.3.6. Mitochondrial membrane potential changes ($\Delta\Psi_m$) measurement assay	113
7.3.7. Hoechst 33258 staining of cells for nuclear morphology	114
7.3.8. Western blot analysis for Cytochrome <i>c</i> /Bcl- 2/Bax expression studies	114
7.3.9. Cytosolic cytochrome <i>c</i> estimation using ELISA technique	115
7.3.10. Caspases assays	115
7.3.11. Quantification of Bcl-2	116
7.3.12. Quantification of Bax	116
7.3.13. DNA agarose gel electrophoresis	117
7.3.14. Quantification of Leukotriene B4	117
7.3.15. Quantification of Prostaglandin E ₂	118
7.3.16. Statistical analysis	118
7.4. RESULTS	118
7.4.1. Antiproliferative activity of dammarane triterpenoid 1 on various cancer cell lines	118
7.4.2. Apoptosis inducing activity of dammarane triterpenoid 1 in MIA PaCa-2 pancreatic cells	120
7.4.2.1. Effect of dammarane triterpenoid 1 on cell cycle of MIA PaCa-2 pancreatic cancer cells	121
7.4.2.2. Effect of dammarane triterpenoid 1 on mitochondrial membrane potential ($\Delta\Psi_m$) in MIA PaCa-2 pancreatic cancer cells	121
7.4.2.3. Effect of dammarane triterpenoid 1 on nuclear morphology of MIA PaCa-2 pancreatic cancer cells	121
7.4.2.4. Effect of dammarane triterpenoid 1 on cytosolic cytochrome <i>c</i> levels in MIA	122

PaCa-2 pancreatic cancer cells

- 7.4.2.5. Effect of dammarane triterpenoid 1 on Bcl-2 levels in MIA PaCa-2 pancreatic cancer Cells 123
- 7.4.2.6. Effect of dammarane triterpenoid 1 on Bax levels in MIA PaCa-2 pancreatic cancer cells 123
- 7.4.2.7. Effect of dammarane triterpenoid 1 on caspases activity in MIA PaCa-2 pancreatic cancer cells 124
- 7.4.2.8. Dammarane triterpenoid 1-induced DNA fragmentation in MIA PaCa-2 pancreatic cancer cells 125
- 7.4.3. Effect of dammarane triterpenoid 1 on LTs levels in MIA PaCa-2 pancreatic cells 126
- 7.4.4. Effect of dammarane triterpenoid 1 on PGs levels in MIA PaCa-2 pancreatic cells 126
- 7.4.5. Pro-apoptotic potential of dammarane triterpenoid 1 in DU145 prostate cancer cells 127
- 7.4.5.1. Effect of dammarane triterpenoid 1 on cell cycle of DU145 prostate cancer cells 127
- 7.4.5.2. Effect of dammarane triterpenoid 1 on mitochondrian membrane potential ($\Delta\Psi_m$) of DU145 prostate cancer cells 128
- 7.4.5.3. Effect of dammarane triterpenoid 1 on cytosolic cytochrome *c* levels in DU145 prostate cancer cells 128

7.4.5.4.Effect of dammarane triterpenoid 1 on Bcl-2 levels in DU145 prostate cancer cells	129
7.4.5.5. Effect of dammarane triterpenoid 1 on Bax levels in DU145 prostate cancer cells	130
7.4.5.6. Effect of dammarane triterpenoid 1 on caspases activity in DU145 prostate cancer cells	130
7.4.5.7. Dammarane triterpenoid 1 induced DNA fragmentation in DU145 prostate cancer cells	131
7.4.6. Effect of dammarane triterpenoid 1 on LTs levels in DU145 prostate cancer cells	131
7.4.7. Effect of dammarane triterpenoid 1 on PGs levels in DU145 prostate cancer cells	132
7.5. DISCUSSION	133
7.6. CONCLUSION	136
