Acknowledgement

I am deeply indebted to respected Dr. HK Sancheti Sir from Pune for his total, invaluable, immense and untiring guidance and help as well as for always being a source of inspiration in the whole research work without which this was next to impossible. I am worthy of getting abided to his constant support up till the completion of this work and know this will continue to enlighten my path towards success.

I am highly obliged to Dr. AS Tondare Sir from Aurangabad for his constant, regular guidance and encouragement for getting this goal completed.

I am also thankful to Dr. Col. SP Jyoti Sir from Pune for providing time to time guidance in this research work, whenever needed.

I am again grateful to The Commissioner, Transport Department, Government of Maharashtra, for ready numerical data on road trauma and available vehicles, which was really important for drawing necessary conclusion.

I owe thanks to ‘Loss Prevention Association of India Ltd.’, Mumbai for ready charts of different types of trauma giving a direction to our study.

My special words of appreciation are towards Prof. Dinesh Mohan Sir from IIT Delhi, Dr. Mathew Varghese Sir from Delhi and Prof. TK Shanmugsundaram Sir from Chennai for consistently guiding me and sharing their knowledge, experiences with me and proving me enormous amount of data available with them.

I am hearty thankful to Civil Surgeon, Jalna and Deputy Director of Health Services, Aurangabad for allowing me to use their data with reference to patients.

I am also thankful to ‘The Lokmat Group’ for the photographs provided on different accidents available with them.

I express my thanks also towards Press and Newspapers for ready news on accidents and trauma from all over the India.

I express my heartful gratitude towards Mrs. Vidya Goyal for looking after the numerical work of the thesis and also being besides encouraging and helping me.

Dr. Satish Goyal.
