

TABLE OF CONTENTS

| | | |
|----------|--|------------|
| 1 | Chapter 1 Introduction | |
| 1.0 | Introduction to Tribology | 001 |
| 1.1 | Bearing | 006 |
| 1.2 | Lubrication | 010 |
| 1.3 | Squeeze Film | 012 |
| 1.4 | Ferro- fluid as Lubricant | 013 |
| 1.5 | Surface Roughness | 020 |
| 1.6 | Porous Medium | 024 |
| 1.7 | Bearing Design Characteristics | 025 |
| 1.8 | Some Important Terminology | 026 |
| 1.9 | Significant Contribution of the Thesis | 030 |
| 2 | Chapter 2 Review of Related Literature | 033 |
| 3 | Chapter 3 Derivation of Reynolds Equation | |
| 3.1 | Mathematical Modelling of a Bearing System | 059 |
| 3.2 | Equation of State | 060 |
| 3.3 | Constitutive Equation of Lubricant | 061 |
| 3.4 | Continuity Equation | 062 |
| 3.5 | The Equations of Motion | 062 |
| 3.6 | Surface Roughness | 063 |

| | | |
|------|---|-----|
| 3.7 | Basic Assumptions of Hydrodynamic Lubrication | 064 |
| 3.8 | Modified Reynolds Equation for porous bearings in Cartesian coordinates | 066 |
| 3.9 | Derivation of equations for Neuringer-Rosensweig model | 071 |
| 3.10 | Derivation of equations for Shliomis model | 072 |
| 3.11 | Derivation of equations for Jenkins model | 073 |

4 Chapter 4 Behaviour of Magnetic Fluid Based Rough Rayleigh Step Bearing

| | | |
|-----|------------------------|-----|
| 4.1 | Introduction | 075 |
| 4.2 | Analysis | 078 |
| 4.3 | Results and discussion | 081 |
| 4.4 | Validation | 103 |
| 4.5 | Conclusion | 104 |

5 Chapter 5 The Performance of an Idealized Rough Porous Hydrodynamic Plane Slider Bearing

| | | |
|-----|------------------------|-----|
| 5.1 | Introduction | 105 |
| 5.2 | Analysis | 108 |
| 5.3 | Results and discussion | 110 |
| 5.4 | Validation | 119 |
| 5.5 | Conclusion | 119 |

| | | |
|-----------|--|-----|
| 6 | Chapter 6 Ferro Fluid Lubrication of a Rough Porous Secant Slider- A Study of Shliomis Model | |
| 6.1 | Introduction | 121 |
| 6.2 | Analysis | 123 |
| 6.3 | Results and discussion | 127 |
| 6.4 | Validation | 136 |
| 6.5 | Conclusion | 137 |
| 7 | Chapter 7 Jenkins Model based Ferro-fluid lubrication of a Rough, Porous Convex pad slider bearing with slip velocity | |
| 7.1 | Introduction | 139 |
| 7.2 | Analysis | 142 |
| 7.3 | Results and discussion | 144 |
| 7.4 | Validation | 165 |
| 7.5 | Conclusion | 166 |
| 8 | General Conclusion | 167 |
| 9 | Future Scope | 169 |
| 10 | Published Research Papers | 171 |
| 11 | References | 173 |
