ACKNOWLEDGEMENT

I express my immense gratitude to Late Professor (Mrs.) Girja Mohd. Miyan, then Professor and Head of the Department, Educational Studies, Jamia Millia Islamia for her generous guidance and support in the pursuit of this study. Her unending help, encouragement, constant inspiration, critical comments and learned suggestions have been a beacon light for me during the study and will continue to be so in future path of my life.

I owe my indebtedness to her for her prudent admonitions, affectionate behaviour and constant encouragement which have been a source of great inspiration to me.

I feel sense of honour and pride to place on record the tireless efforts of my supervisor who has been patiently guiding me and was always ready to guide me at all times.

I feel honoured to express my deep sense of regard to Professor Mohd Miyan, Professor and Head of the Department, Educational Studies, Jamia Millia Islamia for his generous support, valuable guidance and useful interaction. His guidance brought many of his excellent academic insights to bear on the report. His constructive suggestions, unlimited help and constant encouragement during the course of study helped me to reach the goal. With out his sapient and discernible advice, it would not have been possible to complete this task.

I extend my special thanks to Professor S.P. Mullick, retired Professor, STRIDE IGNOU, for his sustained support, inspiration and direction, and who painstakingly provided his learned experience.

I express my sincere thanks to the staff and officers of student evaluation and registration division IGNOU for providing me relevant information from time to time. A word of commendation is due to officers of library particularly Dr. Neela Jagannathan and Seema Chandhok. Their assistance was most essential in carrying out review of literature.

I express my gratitude to the Director SOHS Prof. A.K. Agrawal and my colleagues for their support.

I am also thankful to Mr. Mahalingam for his valuable cooperation, patience and skill in word processing of the manuscript.

I owe my success to my husband Ramesh for his constant encouragement throughout the project. His constant support pulled me through thick and thin.

I am also thank full to my parents and relatives for inspiring me to carry out the study.

My thanks are due to my children, Winall and Nitika for bearing with the inconveniences due to deprivation of due attention to them at many times.

Lastly I pay my heartfelt thanks to learners, Counsellors and Programme incharges of the B.Sc. nursing Programme who willingly participated in the study.

Ms. Pity Koul
Researcher
