

List of Tables

Table No.	Table Description	Page No.
Chapter I		
1.1	Deccan Traps stratigraphy.	6
Chapter II		
2.1	Size properties of the drainage basins under review.	28
2.2	Basinwise variations in the relief parameters.	31
2.3	Basinwise variations in the maximum slope angles and slope curvature.	40
2.4	Basin shape parameters for the DBP rivers.	42
2.5	Basinwise texture parameters for the DBP rivers.	45
2.6	Fractal dimensions of the three major Upland basins and the Konkan region in the DBP.	48
Chapter III		
3.1	Results of the regression analysis of the channel elevation and distance data.	59
3.2	Basinwise variations in average stream gradient index (SL).	62
3.3	Location of steeper segment in the long profiles as indicated by SL index.	64
3.4	The basinwise variations in concavity and steepness indices.	66
Chapter IV		
4.1	Basinwise tectonic indices for the DBP.	79
Chapter V		
5.1	Mean, minimum and maximum values for relief parameters, derived from the swaths profiles.	92
5.2	Width and depth of beheaded valleys on the Ghat edge.	97
5.3	Regression coefficients of valley width-length relationship.	98
Chapter VI		
6.1	Estimates of the total volume of material eroded due to recession of the Western Ghat (in 000 km ³)	120
