

BIBLIOGRAPHY

BIBLIOGRAPHY

ABEL, N. H.

1. Ütesuchungen über die reihe $1 + \frac{mx}{1} + \frac{m(m-1)}{1.2}x^2 + \dots$, Journal für die reine und angewandte Mathematik, (Crelles), L (1826), 311-339.

AGNEW, R. P.

1. The Lototsky method of evaluation of series, Michigan Math. Journal, 4 (1957), 105-128.

BEOHAR, B. K. and SHARMA, K.G.

1. On Nörlund summability of Jacobi series, Indian Journal of Pure and Applied Mathematics, 11 (11), (1980), 1475-1481.

BORWEIN, D.

1. A logarithmic method of summability, Journal of London Mathematical Society, 33 (1958), 212-220.

CAUCHY, A. L.

1. Cours d'analyse de l'cole polytechnique part I. Analyse Algébrique (1821).

CESÀRO, E.

1. Sur la multiplication des series, Bull. des Sci. Math (2), Vol.14 (1890). 114-120.

CHANDRA, P.

1. On the degree of approximation of functions belonging to the Lipschitz class, Nanta Math., 8, (1975), 88-91.

CHAUBEY, V.S.

1. Almost Nörlund summability of conjugate series of Fourier series, Thesis V.B.S. Purvanchal University Jaunpur, (2002).

CHOUDHARY, R.S.

1. On the Nörlund summability of Jacobi series, Rend. Ace. NaZ-Lincei, Ser., 52, (1970), 644-652.

CHOW, Y.S.

1. On the Cesàro summability of double Fourier series, Tōhoku Math. J. 5, (1953), 277-283.

DWIVEDI, G.K.

1. On the uniform harmonic and Nörlund summability of Legendre series, Ph.D. thesis, B.H.U., Varanasi (1970).

FEKETE, M.

1. Vizsgalatok a Fourier- Sovokrol, Matematikaies Termesz Ertesitok, 34 (1916), 759-786.

FOÀ, A.

1. Sulla sommabilita forte della serie Di Legendre, Boll. Univ. Mat. Ital, (2), 5 (1943), 18-27.

GANGULY, A.

1. On (N, p_n) summability of Fourier series and its conjugate series, Indian Jour. Pure Appl. Math. (10), 10 (1979), 1228-1235.

GUPTA, D.P.

1. Nörlund Summability of Jacobi Series, D.Sc. Thesis, University of Allahabad, Allahabad, (1970).

HARDY, G.H.

1. Divergent series, Oxford, (1949).

HARDY, G.H. and LITTLEWOOD, J.E.

1. Sur la serie de Fourier dune fonction a 'carre' sommable, Comtes Rendus de l Academic des sciences des Paris, 156 (1913), 1307-1309.
2. The strong summability of Fourier series, Fundamental Mathematika, 25 (1935), 162-189.

HILLE, E. and TAMARKIN, J.D.

1. On the summability of Fourier series, Trans. Amer. Math. Soc., Vol. 34, (1934), 757-783.

HOBSON, E.W.

1. On the representation of a function by a series of Legendre's functions, proceedings of London Mathematical Society, (2), 7 (1909), 24-29.

HURWITZ

1. Mathematische Annalen, 57(1903), 427.

IYENGAR, K.S.K.

1. A Tauberian theorem and its application to the convergence of Fourier series, Proc. Indian Acad. Sci. A 18, (1943), 81-87.

KARAMATA, J.

1. Theorems Sur la sommabilitee exponentielle et d' autres Sommabilitees s'y rattachant, Mathematica (cluj), 9 (1935), 164-178.

KHARE, S.P. and TRIPATHI, S.K.

1. On (N, p, q) summability of Jacobi series, Indian J. Pure Appl. Math., 19, (1980), 353-368.

KOGBETLIANTZ, E.

1. Über die (C, δ) - summierbarkeit der Laplaceschan reihe für $\frac{1}{2} < \delta < 1$, Mathematische Zeitschrift, 14 (1922), 99-109.
2. Sur les series absolument sommable parla methode des moyennes arithmètiques, Bulletin des Sciences Mathematiques, (2) 49 (1925), 234-256.

LAL, SHYAM.

1. Acta Ciencia Indica, (1998).
2. On the degree of approximation of conjugate of Fourier belonging to weighted $W(L^p, \xi(t))$ class by matrix summability means of conjugate series of a Fourier series, Tamkang Journal of Math. 11 (1), 2000, 7-16.

LAL, S. and PRATAP, A.

1. On uniform matrix summability of Fourier series, Bull. Cal. Math. Soc. 91 (5), (1999), 427-432.

LEBESGUE, H.

1. Richerches sur la convergence des series de Fourier, Mathematische Annalen, 61 (1905), 251-280.

LORENTZ, G.G.

1. A contribution to the theory of divergent series, Acta Mathematica, 80 (1948), 167-190.

MAZHAR, S.M. and SIDDIQUI, A.H.

1. On almost summability of a trigonometrical sequence, Acta mathematica Acad. Sci., Hung., 20 (1-2), (1969), (21-24).

McFADDEN, L.

1. Absolute Nörlund summability, Duke Math.J., 9 (1942), 167-202.

NÖRLUND, N.E.

1. Sur une application des fonction permutables, Lunds Universitets Arsskrift, (2), 16 (1919), 1-10.

PANDEY, G.S.

1. Math. Student. 45. (1977), 80-83.

PANDEY, G.S. and BEOHAR, B.K.

1. On Nörlund summability of Jacobi series, Indian J. Pure Appl. Math., 9, (1978), 501-509.

PATI, T.

1. A generalization of a theorem of Iyenger on the harmonic summability of Fourier series, India Journal of Math., 3, (1961), 85-90.

PETERSEN, G.M.

1. Regular Matrix Transformations. Mc Graw Hill Book Co., Inc., (1966), London.

PRASAD, B.N.

1. The absolute summability (A) of Fourier series, Proceedings of the Edinburgh Mathematical Society, (2), 2 (1930), 129-134.
2. On the summability of Fourier series and bounded variation of power series, Proceedings of the London Mathematical Society, (2), 35 (1933), 407-424.

PRASAD, R.

1. On the Uniform Nörlund summability of Legendre series, Indian J. pure Appl. Maths. 10 (10) (1979), 1298-1302.

QURESHI, K.

1. On the degree of approximation of a periodic function of by almost Nörlund mean, Tamkang Journal Maths, 12 (1), (1981), 35-38.

RAI, O.P.

1. Proc. Japan Acad. 41, (1965), 790-795.

RIESZ, M.

1. Sur l'equivalence de certaines methodes de sommation, Proceedings of London Mathematical Society, (2) 22 (1924), 412-419.

RHOADES, B.E.

1. Analysis 4, (1984), 323-334.

SAHNEY, B.N. and RAO, V.V.G.

1. Error bounds in the approximation of functions, Bull. Austr. Math. Soc., 6, (1972 a), 11-18.
2. Error bounds in the approximation of functions, Corrigenda and acknowledgement, Bull. Austr. Math. Soc., 6, (1972 b), 480.

SANSONE, G.

1. Orthogonal functions, English Edition, (1959).

SHARMA, P.L.

1. On the harmonic summability of double Fourier series. Proc. Amer. Math. Soc., 91, (1958), 979-986.

SHARMA, P.L., DIXIT, S.S. and SHUKLA, Y.B.

1. On almost Borel summability of Fourier series, Tamkang J. Math., 8, (1977), 61-65.

SHARMA, P.L. and QURESHI, K.

1. On the degree of approximation of a periodic function by almost Riesz means. Ranchi Univ. Math. J., 11, (1980).

SIDDIQUI, J.A.

1. On the harmonic summability of Fourier series, Proc. Nat. Acad. Sci. India. Sect. A, 28, (1948), 527-531.

SINGH, T.

1. On Nörlund summability of Fourier series and its conjugate series, Proceedings of the National Institute of Science of India (A), (1963), 1, 29, 65.

SINGH, U.N. and Singh, V.S.

1. Almost Nörlund summability of conjugate series of Fourier series, Bull. Cal. Math. Soc., (1995), 87, 57-62.

SZÀSZ, O.

1. Introduction to the theory of divergent series, University of Cincinnati, (1946).

SZEGÖ, G.

1. Orthogonal polynomials, American Mathematical Society Collegium publication, Newyork, (1959).

THORPE, B.

1. Nörlund summability of Jacobi series, J. Reine Angew. Math. 276 (1975). 137-141.

TITCHMARSH, E.C.

1. The theory of functions, Second Edition, Oxford, Oxford University Press, (1939).

TOEPLITZ, O.

1. Überallgemeine linear Mittelbildungen P.M.F., (1913), 113-119.

TRIPATHI, L.M. and LAL, SHYAM.

1. Almost Nörlund summability of conjugate series of Fourier Series, Vijnana Parishad Anusandhan Patrika 27 (2), (1984), 175-181.
2. On Uniform triangular matrix summability of Legendre series, Vijnana Parishad Anusandhan Patrika, Vol.28, No. 1, (1985).

TRIPATHI, L.M., TRIPATHI, V.N. and YADAV, S.T.

1. On Nörlund summability of Jacobi series, Proc. Math. Soc. B.H.U., 4 (1988), 183-193.

TRIPATHI, L.M. and OJHA, M.A.

1. A theorem on the Nörlund summability of a double Fourier series, Jour. of Sci, Res. 31 (1), (1982), 245-251.

VARSHNEY, O.P.

1. Pro. Am. Math. Soc. 10, (1959), 790-795.

WANG, F.T.

1. Note on H_2 summability of Fourier series, Journal of London Mathematical Society, 19 (1944), 209.

WHITTAKER, J.M.

1. The absolute summability of Fourier series, Proceedings of the Edinburgh Mathematical Society, (2), 2 (1930), 1-5.

WORONOI, G.E.

1. Extension of the notation of the limit of the sum of terms of an infinite series, Annals of Mathematics, 33 (1932), 422-432.

YOUNG, W.H.

1. On the usual convergence of a class of trigonometrical series, proceedings of London Mathematical Society, 13 (1914), 13-28.

ZYGMUND, A.

1. Trigonometric series, V. Warsawa, (1935), 40-41.
