

List of Figures

2.1	Primary (commercial) energy consumption viz. GDP	10
2.2	The break-up of commercial energy	11
2.3	Energy use per \$ 1,000 GDP (in PPP)	18
2.4	Commercial energy consumption per capita	18
2.5	The rise of rural electrification	22
2.6	Socio-economic disparities in access to electricity	24
2.7	Socio-economic disparities in access to gas	25
2.8	Human Development Index in Brazil,China and India	31
3.1	Net import of coal	56
4.1	Inefficiency of RoRR	88
4.2	Electricity sector unbundling and competition	104
5.1	Fuel cost per MW of Indian thermal plants in the year 2005-06	123
5.2	Market with Perfectly Inelastic Demand vis-a-vis downward sloping demand curve	126
5.3	Operating margins visa a viz fuel cost of the plants	131
6.1	Schematic diagram of the single buyer model	138
6.2	Fuel cost per MW of Indian thermal plants in the year 2005-06	146
6.3	Load curve (\bar{Z}_{OR}) and power actually supplied by the DISTCO for the state of Orissa and with a regulated tariff of 1000[Rs/MWh]	150
6.4	Load curve (\bar{Z}_{OR}) and power actually supplied by the DISTCO for the state of Orissa and with a regulated tariff of 1200[Rs/MWh]	150
6.5	Disutility to the regulator for different regulated retail tariff \bar{P}_{OR}	151

6.6	Spot price trajectory vs desired demand for respective \bar{P}_{OR}	152
7.1	Determination Capacity for different types of Plant	161
