

ACKNOWLEDGEMENT

It would be an effrontery on my part if I staged an attempt at acknowledging like a matured scientist –all the inspiration, guidance, help and cooperation that I have received from all those who love me and nearer to me-during my academic sojourn-like that of a baby who has just learned to walk.

Nevertheless, I shall be failing my duties and be enveloped with a guilty conscience if I do not express how thankful and grateful I am, to my revered guides Dr. Sankar Ghatak and Dr. Kausik Dana who have never failed to inspire me.

Financial support from CSIR, India in the form of Senior Research Fellowship is thankfully acknowledged.

I wish to thank Dr. Tapas Kumar Mukhopadhyay, Scientist of CG&CRI and all the persons of Advanced Clay and Traditional Ceramics Division. I am also grateful to the technical staffs of CG&CRI who helped me lot during various characterizations.

I wish to express my gratitude to Prof. I. Manna, Director, CSIR-CG&CRI.

Before I end, I would like to walk down the memory lane to pay tribute to all the teachers in my life who have enlightened me with their knowledge to carry me this far. My parents, husband, daughter Sharanya and all the well wishers have contributed in shaping me to able to be tackle the brighter and as well as the darker aspect of life with equal ease. With all of them I grew up slowly to step into the real big world of Science and Technology.
