

LIST OF TABLES

Table No	Title	Page No
1.1	Indian production of turmeric	2
1.2	State wise production of turmeric	3
1.3	Indian exports of turmeric	3
1.4	Important importing countries of turmeric from India	4
3.1	Varietal characteristics of turmeric	42
3.2	Blade geometry adopted for various crops	52
3.3	Peripheral velocity of conveyer-elevator adopted in various harvesters	58
3.4	Slope of conveyer-elevator adopted in various harvesters	59
4.1	Soil moisture at different periods after wetting	74
4.2	Cone index of clay loam soil	74
4.3	Weight of turmeric rhizome at the time of harvest	77
4.4	Number of fingers per hill	78
4.5	Results of manual harvesting of turmeric	79
4.6	Performance evaluation of tractor mounted turmeric digger (TNAU model)	81
4.7	Effect of various blade geometries and rake angles on depth of cut of soil	83
4.7.1	Interaction between various blade geometries and rake angles on depth of cut of soil	84
4.7.2	ANOVA of interaction between various blade geometries and rake angles on depth of cut of soil	85
4.8	Effect of various blade geometries and rake angles on harvesting efficiency	86
4.8.1	Interaction between various blade geometries and rake angles on the harvesting efficiency	87
4.8.2	ANOVA of interaction between various blade geometries and rake angles on harvesting efficiency	88
4.9	Effect of blade geometries and rake angles on damage to turmeric rhizome	89

4.9.1	Interaction between blade geometries and rake angles on damage to turmeric rhizome	90
4.9.2	ANOVA of interaction between various blade geometries and rake angles on damage to turmeric rhizome	91
4.10	Effect of blade geometries and rake angles on undug turmeric rhizome	93
4.10.1	Interaction between blade geometries and rake angles on undug turmeric rhizome	94
4.10.2	ANOVA of interaction between blade geometries and rake angles on undug turmeric rhizome	94
4.11	Effect of blade geometries and rake angles on draft	96
4.11.1	Interaction between various blade geometries and blade angles on draft	97
4.11.2	ANOVA of Interaction between various blade geometries and blade angles on draft	97
4.12	Effect of blade geometry and rake angle on depth of cut, harvesting efficiency, damage to turmeric rhizome, undug turmeric rhizome, and draft	99
4.13	Effect of conveyor length and size of screen on the percentage of rhizome carried over	101
4.13.1	Interaction between conveyor length and size of screen on percentage of rhizome carried over	102
4.13.2	ANOVA of interaction between conveyor length and size of screen on percentage of rhizome carried over	102
4.14	Effect of conveyor length and screen size on percentage of soil carried over	104
4.14.1	Interaction between conveyor length and screen size on percentage of soil carried over	105
4.14.2	ANOVA of interaction between conveyor length and screen size on percentage of soil carried over	105
4.15	Effect of conveyor length and screen size on percentage damage to turmeric rhizome	107

4.15.1	Interaction between conveyor length and screen size on percentage of damage to rhizome	108
4.15.2	ANOVA of interaction between conveyor length and screen size on percentage of damage to rhizome	108
4.16	Effect of conveyor length and screen size on turmeric rhizome carried over, soil carried over, and turmeric rhizome damaged	110
4.17	Effect of type of conveyor-elevator strip and speed of conveyor on turmeric rhizome conveyed	112
4.17.1	Interaction between type of elevator strip and speed of conveyor on percentage rhizome conveyed	113
4.17.2	ANOVA of interaction between type of elevator and speed of conveyor on percentage of rhizome conveyed	113
4.18	Effect of type of conveyor-elevator strip and speed of conveyor on the percentage of soil carried over	114
4.18.1	Interaction between type of conveyor-elevator strip and speed of conveyor on percentage of soil carried over	115
4.18.2	ANOVA of interaction between type of conveyor-elevator strip and speed of conveyor on percentage of soil earned over	115
4.19	Effect of type of conveyor- elevator-strip and speed of conveyor on damage to turmeric rhizome conveyed	117
4.19.1	Two factor analysis between types of conveyor-elevator strip and conveyor speed on damage to rhizome conveyed	118
4.19.2	ANOVA on interaction between type of conveyor-elevator strip and conveyor speed on damage to rhizome conveyed	118
4.20	Effect of conveyor-elevator strip type and speed of conveyor on rhizome carried over, soil carried over, and rhizome damaged	120
4.21	Performance test results of tractor mounted turmeric harvester (average of 5 trials) in comparison with manual digging	127
4.22	Cost economics of tractor mounted turmeric harvester	130

LIST OF FIGURES

Fig. No	Title	Page No
3.1	Tractor mounted turmeric harvester	62
3.2	Tractor mounted turmeric harvester	63
3.3	Tractor mounted turmeric harvester	64
4.1	Spread of turmeric rhizome in soil	76
4.2	Effect of blade geometries and rake angles on depth of cut of soil	84
4.3	Effect of blade geometries and rake angles on the harvesting efficiency	87
4.4	Effect of blade geometries and rake angles on damage to turmeric rhizome	90
4.5	Effect of blade geometries and blade angles on undug turmeric rhizome	93
4.6	Effect of blade geometries and rake angles on draft	96
4.7	Effect of conveyor length and size of screen on the percentage of turmeric rhizome carried over	101
4.8	Effect of conveyor length and size of screen on percentage of soil carried over	104
4.9	Effect of conveyor length and size of screen on percentage of damage to rhizome	107
4.10	Effect of conveyor length and screen size on turmeric rhizome carried over, soil carried over, and turmeric rhizome damaged	110
4.11	Effect of type of elevator strip and speed of conveyor on percentage of rhizome conveyed	112
4.12	Effect of type of conveyor-elevator and speed of conveyor on percentage of soil carried over	115
4.13	Effect of type of conveyor-elevator strip and conveyor speed on damage of rhizome conveyed	117
4.14	Effect of conveyor-elevator strip type and conveyor speed on rhizome carried over, soil carried over, and rhizome damaged	120

LIST OF PLATES

Plate. No	Title	Page No
3.1	Fully grown turmeric crop stand in field	36
3.2	Closer view of turmeric plant	36
3.3	Matured turmeric rhizome	37
3.4	Turmeric rhizome ready for harvest with cut foliage spread over the field	37
3.5	Conventional method of turmeric rhizome digging with fork type spade	39
3.6	Women labour picking harvested rhizomes	39
3.7	Various types of digging blades used for experimental trial	54
3.8	Straight blade with digging chisel in front and guiding rake behind the blades	54
3.9	Conveyor support frame	56
3.10	Various types of conveyor-elevator strip used for experimental trial	56
3.11	Conveyor chain with elevator strip	57
3.12	Model of turmeric harvester	57
3.13	Power transmission through gear for elevator in experimental model	66
3.14	Turmeric digger blade mounted to the three point linkage of tractor	66
3.15	Conveyor-elevator assembly with drive components	67
3.16	Gear box with chain and sprocket drive for conveyor-elevator	67
4.1	Prototype tractor drawn turmeric harvester- front view	123
4.2	Prototype tractor drawn turmeric harvester-side view	123
4.3	Prototype turmeric harvester mounted on the tractor	124
4.4	Prototype turmeric harvester in operation	124
4.5	Closer view of turmeric harvester in operation	125
4.6	Turmeric field harvested with prototype harvester	125
4.7	Turmeric harvested with prototype harvester - Close view from front	126
4.8	Turmeric harvested with prototype harvester - Close view from rear	126

LIST OF APPENDICES

Appendix	Title
Appendix A	Specification Sheet
Appendix B	Field Operation Data Sheet
