

LIST OF FIGURES

Fig. No.	Title	Page No.
1	Diagram of the approximate geometry of <i>Aloe vera</i> leaves and definition of parameters for volume calculation	49
2	Flow chart of laboratory procedures for quality estimation in <i>Aloe vera</i>	58
3	Plant height and spread (cm) of different accessions of <i>Aloe vera</i> at 240 DAP	216
4	Number of leavers per plant of different accessions of <i>Aloe vera</i> at different growth stages	216
5	Leaf width and leaf thickness (cm) in different accessions of <i>Aloe vera</i> at 240 DAP	218
6	Mean leaf weight (g) and pooled leaf yield plant ⁻¹ (g) plant of different accessions of <i>Aloe vera</i>	218
7	Pooled leaf yield and gel yield (t ha ⁻¹) in different accessions of <i>Aloe vera</i>	224
8	Total solids, soluble solids and fibre content (%) in gel of different accessions of <i>Aloe vera</i>	224
9	Proline content ($\mu\text{g g}^{-1}$) in leaf of different accessions of <i>Aloe vera</i>	230
10	Genetic advance as per cent of mean and Heritability estimates (BS) for the different characters of <i>Aloe vera</i>	236
11	Contribution of various characters towards genetic diversity in <i>Aloe vera</i>	246
12	Effect of spacing and forms of manures on number of leaves plant ⁻¹ of <i>Aloe vera</i> at 240 DAP	253
13	Effect of spacing and forms of manures on leaf length and width (cm) of <i>Aloe vera</i> at 240 DAP	253
14	Effect of spacing and forms of manures on Net Assimilation Rate ($\text{g cm}^{-2} \text{ day}^{-1}$) of <i>Aloe vera</i> at 61-120, 121-180 and 181-240 DAP	273
15	Effect of spacing and forms of manures on mean leaf weight (g) <i>Aloe vera</i>	273
16	Effect of spacing and forms of manures on pooled leaf yield and gel yield (t ha ⁻¹) of <i>Aloe vera</i>	283
17	Effect of spacing and forms of manures on NPK content (%) of <i>Aloe vera</i> leaves	283
