ASHRAE Heating, Refrigerating
and Air-Conditioning JOURNAL.

345 East 47 Street, New York,
N. Y. 10017(212) PL 2-6800.

May 19, 1971.

Professor L.N. Misra,
Professor of Mechanical Engineering,
Regional Engineering College,
Rourkela - 8, Orissa, INDIA.

SUBJECT: PROSPECTS OF POWER-PLANT CYCLES USING REFRIGERANTS

Dear Professor Misra:

Our technical review committee has completed its evaluation of your paper, and they have recommended we publish it, contingent upon some revisions. The Committee's comments are attached.

I would appreciate hearing from you as to whether you can make the suggested changes, and when I can expect to receive a final draft of the manuscript.

(Number 2 is a very minor point. Generally, we change "Freon" to R 12, except when the context requires reference specifically to Du Pont's product, in which case, we leave it "Freon".)

Thank you very much for your patience, and for your interest in ASHRAE JOURNAL. I look forward to receiving your final draft, as I believe it will be a welcome contribution to ASHRAE literature.

Cordially,

ASHRAE JOURNAL
Sd/-David Houston
Associate Editor.
