

LIST OF TABLES

Chapter	Table No.	Description	Page
<u>PART - A.</u>			
1.	1.1	Important Properties of common Freon Refrigerants	3
2.	2.1	Verification of Beattie-Bridgeman Equation for Freon 12	20
3.	3.1	Critical Temp. of Freon Refrigerants	42
	3.2	Critical Pressure of Freon Refrigerants	43
	3.3	Critical Volume of Freon Refrigerants	44
	3.4	Consolidated Critical Properties of Freon Refrigerants	45
4.	4.1	Estimated molal heat capacities of Freon Gases at zero pressure	51
	4.2	Comparison of C_p^* Values	55
5.	5.1	Critical Properties of common Freon Refrigerants	63
	5.2	Comparison of Vapour Pressure results of F 11	66
	5.3	Comparison of results with the published data for F 12	74
	5.4	Comparison of results with the published data of 1961 for F 11	75
	5.5	Comparison of results with the published data of 1969 for F 11	76
	5.6	Thermodynamic Properties of F11	77

LIST OF TABLES

PART - B

1.	1.1	Summary of performances	103
2.	2.1	Properties of the working fluid in gas turbine	113
	2.2	Properties of F 12	116
	2.3	Details of turbine Parts	134
3.	3.1	Rankine efficiency values of R 113, R 114 and R 500 used in Supercritical cycles	152
	3.2	Thermal efficiencies of sub-critical power plant cycles using refrigerants as working media	155
