The investment having high return and low risk is a motivating factor to all types of investors in any country. Investors may have many queries regarding i.e. what are various investment opportunities, what are the popular stocks, sectoral growth, security and less risk on investments, rate of return, etc. The researcher makes an attempt to elucidate the above queries under title “YEAR-WISE AND QUARTER-WISE ANALYSIS OF STOCKS AND SECTORS OF NIFTY STOCK FUTURES IN NATIONAL STOCK EXCHANGE OF INDIA FOR THE PERIOD OF EIGHT YEARS FROM 2006 TO 2014”. Derivatives provide a platform to minimise the risk by transferring risk to others and discovery of prices. Most of the investors seem the derivatives as a perfect risk management tool to get fruitful returns with less risk. India is one of the most successful developing country in terms of a vibrate market for exchange-traded derivatives. So, the researcher has undertaken this research work to study the frequencies of future contracts on two points (i) the performance of stock futures on NSE Nifty in terms of contracts and turnovers. (ii) Study the sectoral growth and their effects on stocks listed on NSE Nifty.
