<b>Synopsis</b>	<b>vi</b>
<b>List of Publications</b>	<b>xviii</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Introduction	1
1.2 Historical Background	2
1.3 Fundamental Processes of Ion-Atom Collision	3
1.3.1 Direct Ionization(DI)	3
1.3.2 Ionization by Electron Capture(EC)	5
1.3.3 Molecular Orbital Promotion	6
1.4 Ionization by Photons	6
1.5 Ionization of L-Subshell	7
<b>2 Theoretical Methods</b>	<b>17</b>
2.1 Introduction	17
2.2 Theoretical Formalisms of Direct Ionization(DI)	18
2.2.1 Plane Wave Born Approximation(PWBA)	19
2.2.2 Modified PWBA theory or ECPSSR formalism	23
2.2.3 Semiclassical Approximation(SCA)	29
2.3 Ionization by Electron Capture(EC)	33
2.4 Theoretical Formalism of Innershell Ionization by Photon Impact	35
2.4.1 Interaction of photons with the Coulomb field	36
2.4.2 Central Potential Model	39
2.5 Decay yield Parameters	40

2 5 1	Fluorescence Yield Parameters . . . . .	42
2 5 2	Coster-Kronig Factors $f_{ij}$ . . . . .	43
2.5.3	Relative Radiative Transition Probabilities . . . . .	43
<b>3</b>	<b>Experimental Details</b>	<b>51</b>
3 1	Charged Particle ionization . . . . .	51
3 1.1	Introduction . . . . .	51
3 1.2	Description of the Experimental Setup . . . . .	52
3.1.3	Target preparation . . . . .	61
3.1.4	Experimental Determination of Efficiency of Si(Li) Detector	64
3.1.5	Target thickness and Other corrections . . . . .	65
3 1.6	Data Analysis . . . . .	68
3.1.7	Error Analysis	71
3 1.8	Estimation of Experimental ionization cross-sections	71
3 2	Ionization by Photons . . . . .	73
3 2.1	Introduction . . . . .	73
3 2.2	Experimental Set up . . . . .	73
3 2.3	Photon Flux Measurement . . . . .	76
3 2.4	Data analysis . . . . .	76
<b>4</b>	<b>L-subshell ionization studies of some heavy atoms (<math>79 \leq Z \leq 83</math>)</b>	
	<b>with heavy charged particles</b>	<b>82</b>
4 1	Introduction . . . . .	82
4 2	L-shell X-ray production cross-section measurements of Pb and Bi for	
	Proton impact . . . . .	83
4 2.1	Introduction . . . . .	83
4 2.2	Theoretical Calculations . . . . .	84
4 2.3	Experimental Results and Discussion . . . . .	86
4.3	L-subshell ionization studies of Pb and Bi for $\alpha$ -particle bombardment	105
4 3.1	Introduction . . . . .	105
4 3.2	Theoretical Calculation . . . . .	106
4.3.3	Experimental Results and Discussion . . . . .	107
4.4	L-subshell ionization studies of Au for $\alpha$ -particle and L <sub>1</sub> ion bombard-	
	ment . . . . .	128

4.4.1	Introduction . . . . .	128
4.4.2	Experimental Results and Discussion . . . . .	131
4.5	L-subshell ionization studies in Au and Bi for 4.8-8.8 MeV boron ion bombardment . . . . .	138
4.5.1	Introduction . . . . .	138
4.5.2	Experimental Results and Discussion . . . . .	141
4.6	L-subshell ionization studies in Au and Bi for $^{19}F$ and $^{28}Si$ ion bombardment . . . . .	154
4.6.1	Introduction . . . . .	154
4.6.2	Experimental Results and Discussion . . . . .	155
4.7	L-subshell ionization studies in Au and Bi for $^{28}Si$ and $^{32}S$ ion bombardment . . . . .	169
4.7.1	Introduction . . . . .	169
4.7.2	Experimental Results and Discussion . . . . .	170
<b>5</b>	<b>L-subshell ionization studies of some heavy atoms (<math>73 \leq Z \leq 83</math>) with 59.54 keV photons</b>	<b>179</b>
5.1	Introduction . . . . .	179
5.2	Relative L-Shell X-ray studies in Pt, Pb and Bi . . . . .	179
5.2.1	Introduction . . . . .	179
5.2.2	Experimental Results and Discussion . . . . .	180
5.3	L-subshell ionization studies in Ta, Au and Pb . . . . .	183
5.3.1	Introduction . . . . .	183
5.3.2	Experimental Results and discussion . . . . .	184
<b>6</b>	<b>Summary and Conclusion</b>	<b>194</b>
