

CONTENTS

<i>PARTICULARS</i>	<i>Page No.</i>
<i>Preface</i>	<i>i-ii</i>
<i>List of abbreviation</i>	<i>iii</i>
<i>Chapter 1.</i>	
<i>HISTORICAL DEVELOPMENT AND CURRENT SCENARIO OF LEISHMANIASIS</i>	<i>1-46</i>
<i>1.1 Introduction</i>	
<i>1.2 Life cycle of leishmania parasite</i>	
<i>1.3 Amastigotes and Promastigotes</i>	
<i>1.4 Species Sensitivity</i>	
<i>1.5 Chemotherapy of leishmaniasis</i>	
<i>1.6 Resistance to antileishmanial drugs</i>	
<i>1.7 Drug Combination Strategy</i>	
<i>1.8 Plant products against Leishmania</i>	
<i>1.9 New targets under investigation</i>	
<i>1.9.1 Trypanothione Reductase/ Peroxidase</i>	
<i>1.9.2 Topoisomerase</i>	
<i>1.9.3 Sphingolipid synthesis</i>	
<i>1.9.4 Fumarate reductase</i>	
<i>1.9.5 Microtubule associated proteins</i>	
<i>1.9.6 Squalene synthesis</i>	
<i>1.9.7 Cysteine proteases</i>	
<i>1.9.8 Methionine aminopeptidase 2</i>	
<i>1.9.9 Protein kinases</i>	

1.10 *Conclusion*

1.11 *References*

Chapter 2. GENERAL EXPERIMENTAL PROCEDURES

47-53

2.1 *Chemistry*

2.2 *Biological Activity*

2.3 *References*

Chapter 3 SYNTHESIS AND ANTILEISHMANIAL ACTIVITY OF NOVEL QUINAZOLINE DERIVATIVES

54-99

3.1 *Introduction*

3.2 *Synthesis of quinazoline derivatives*

3.3 *Antileishmanial activity*

3.4 *Results and discussion*

3.5 *Conclusion*

3.6 *Experimental section*

3.7 *References*

NMR spectra of selected compounds

Chapter 4. SYNTHESIS AND BIOLOGICAL EVALUATION OF NOVEL PYRAZOLINE DERIVATIVES

100-141

4.1 *Introduction*

4.2 *Chemistry*

4.3 *Antileishmanial activity*

4.4 *Result and Discussion*

4.5 *Conclusion*

4.6 *Experimental section*

4.7 *References and notes*

NMR spectra of selected compounds

**Chapter 5 SYNTHESIS AND ANTILEISHMANIAL ACTIVITY OF NEW QUINOLINE
DERIVATIVES** **142-159**

5.1 *Introduction*

5. *Chemistry*

5.3 *Antleishmanial activity*

5.4 *Result and Discussion*

5. *Conclusion*

5.5 *Experimental section*

5.6 *References and notes*

NMR spectra of selected compounds
