

List of Tables

		Page
5.1	Properties of MR fluid used for present investigation.	78
5.2	Nomenclature of parameters used in design	81
5.3	Magnetorheological Damper Working Dimensions	95
6.1	Hole position – Stroke length data	111
6.2	Setting parameters for experiment	113
6.3	Measured maximum force, controllable force and dynamic range and their comparison with analytical results for the value of Amplitude = 0.5 cm.	119
6.4	Measured maximum force, controllable force and dynamic range and their comparison with analytical results for the value of Amplitude = 1.0 cm.	125
6.5	Measured maximum force, controllable force and dynamic range and their comparison with analytical results for the value of Amplitude = 1.5 cm.	131
6.6	Measured maximum force, controllable force and dynamic range and their comparison with analytical results for the value of Amplitude = 2.0 cm.	137
7.1	Parameters and their levels	142
7.2	Design matrix with responses (Total Damping Force)	142
7.3	ANOVA (partial sum of square) for total damping force (F)	143
