Plate-1: Photographs of *Sida glutinosa*  
Plate-2: Photographs of *Neanotis wightiana*  
Plate-3: Photographs of *Ichnocarpus frutescens*  

Scheme-1.1: Probable biosynthetic route of 20-hydroxyecdysone  
Scheme-1.2: Probable mass fragmentation of 247  
Scheme-1.3: FAB-Mass fragmentation of 248  
Scheme-1.4: Probable EI-MS fragmentation of alkaloid 249  
Scheme-2.1: FAB-Mass fragmentation of compound 97  
Scheme-2.2: FAB-Mass fragmentation of compound 99  

Table 1.1: List of phytochemicals from different *Sida* species.  
Table 1.2: List of some new typical flavonol glycosides reported during the last five years (since 2008) with plant source.  
Table 1.3: List of naturally occurring new Phytoecdysteroids reported since 1999.  
Table 1.4. $^1$H-(600 MHz) and $^{13}$C-(150 MHz) NMR Spectral data of glutinoside (247) in CD$_3$OD ($\delta$ in ppm).  
Table 1.5. $^1$H-(300 MHz) and $^{13}$C-(75 MHz) NMR Spectral data of compound 248 in CD$_3$OD ($\delta$ in ppm).  
Table 1.6. $^1$H-(400 MHz) and $^{13}$C-(100 MHz) NMR Spectral data of compound 249 in CD$_3$OD ($\delta$ in ppm).  
Table 1.7. Percentage of inhibition (%) of compounds 247, 248, 250 $\mu$g/mL against DPPH in *in vitro* assay.  
Table 2.1: List of phytochemicals from different *Hedyotis* species.
Table 2.2: List of bayogenin saponins with plant source. II – 10

Table 2.3. $^1$H (600 MHz) and $^{13}$C-(150 MHz) NMR spectral data of neanoside A (97) in CD$_3$OD ($\delta$ in ppm). II – 35

Table 2.4. $^1$H-(600 MHz) and $^{13}$C-(150 MHz) NMR Spectral data of compound NW-2 (99) in DMSO-$d_6$ ($\delta$ in ppm). II – 53

Table 2.5. $^1$H-(400 MHz) and $^{13}$C-(100 MHz) NMR Spectral data of compound NW-3 (100) in DMSO-$d_6$ ($\delta$ in ppm). II – 66

Table 2.6. Biochemical analysis of serum enzymes by neanoside A (97). II – 86

Table 2.7. Biochemical analysis of serum enzymes by 3a-hydroxy olean-12-en-27-oic acid (99, HOA) and stigmasterol glucoside (100, SG).

Table 3.1: List of phytochemicals reported from different Ichnocarpus species. III – 2

Table 3.2. DPPH Scavenging Activity (% of inhibition) of the Fractions of MeOH extract of Ichnocarpus frutescens Roots and BHT (control). III – 24

Table 3.3. In vitro antioxidant activity of different fractions of methanol extract and BHT. III – 25
