ACKNOWLEDGEMENTS

Words have their own handicap. They shall never be able to describe the spirit of cooperation with that I have worked together nor shall they ever be able to express the feeling I feel towards my guides. Yet I avail this opportunity to acknowledge the academic interactions and exchange of views with all the individuals who contributed towards this Thesis work.

First mention goes to Dr. Pratima Gautam, Data warehouse and data mining expert supervisor extraordinaire. Although he had even more work to do than I did for most of the year, she was always there to give me brilliant advice whenever I needed it. Thank you very much Gautam Madam, I hope this work repays your faith in me in some way, and I hope I can continue to repay you by continuing this work next year.

I express my deep sense of gratitude and indebtedness to my thesis direct some idea to build Prof. V.K. Varma, and Prof. Amitabh Saxena, Prof. Vimal N. Pandya who has recommended and encouraged me for taking up this thesis and constant supervision throughout the work and I am very thankful to him whose continuous involvement of creative ideas has helped me to develop this research work.

To Dr. Vijay Singh, more thanks go to you than I can express. You put up with a lot from me all year without complaint, provided more assistance and advice than I could ever have asked for or expected, and kept me focused and sane through everything. Put simply, I don't think I would've made it through the year without your help.

I would also like to very thankful to Prof. Basant Singh, and Prof. Sitesh Sinha, thank for his valuable comments.

I am also thankful to my colleagues Prof. Deepti Maheswari, Prof. Sangita Jouhari, Prof. Deependra Jha, Prof. Dr. Ashi Dixit, Asst. Prof. Shuriti Trang for their inspirational comments and everlasting support.
To the very fine people of Dr.R.R. Lal, Dr.V.B. Gupata, Mr. Amit Maheswari, Mr. Rajendra Singh Rajput, Mr. Govind Singh Rajput, Prashant, I send a very big thank you. You not only provided a work environment that I looked forward to each day, where I could always learn, improve my skills, and be far too entertained, but you paid me to do it. You also deserve very special thanks for being incredibly understanding whenever I needed time away from work: I don’t think this thesis could have been produced otherwise.

To my parents, thank you for all the love and support. You know it means a lot to me, and that I would not be here without you. And to Rupesh and Ritesh, my Big B brother, I'm always thinking of you, and I know you can get through.

Last but not Least, I am very much grateful to my wife Deepti Vaikar, Vaikar family members without whom this piece of work is incomplete.

Gajendra Kumar Vaikar
