

ACKNOWLEDGEMENTS

I wish to thank my advisor, Dr. V. S. Rao, for his guidance and encouragement throughout my Ph.D. course. I am indebted to him for his constant support, freedom in planning and executing the experiments. His leadership qualities and positive outlook have inspired me all the time.

I express my thanks to Dr. Shubhada Tamhankar for her untiring support, valuable guidance and critical suggestions. I value her concerns and motivation and discussions with her have been very stimulating and helped me to make most logical plan of action for work.

I am also thankful to the Director, Agharkar Research Institute for providing me the research facilities. The support and field facility provided by our group in charge Dr.S.C.Misra is greatly acknowledged.

I express my gratitude to Dr. D.G. Naik for helping me with the chemical characterization of the antimicrobial compounds. I also thank Dr. Sanjay Kumar Singh and Dr. Prashant Dhakephalkar for providing me the microbial cultures. I am grateful to Dr. Ashwini and the Botany group of Agharkar Research Institute for their generous help in carrying out the HPTLC analysis. Thanks are due to Dr. Kaushik Banerjee, National Research Centre for Grapes, for providing the LC-MS facility. I am thankful to Dr. Dasharath Oulkar, National Research Centre for Grapes, for helping me to interpret the LC-MS data. Next, I wish to thank Dr. Srinivas Hotha, Associate Professor, Chemistry, Indian Institute of Science Education and Research, Pune for his help in NMR analysis. Special thanks are due to Dr. Sachin Punekar for clicking the photographs which has helped me to improve the appearance of my thesis.

I wish to express my sincere thanks to scientific and non-scientific staff of ARI, especially the Genetics family, for their help, encouragement and goodwill. A journey is always more enjoyable with good friends. I convey my special thanks to Anjali, Bharati, Lilly, Manjusha, Dr. Manoj Oak, Dr. Ravindra Patil, Meghana and Vrushali for the constant encouragement and help provided by them during needy hours. I wish to express my thanks to Ajit, Anuja, Arvind Charuta, Dr.Papiya, Dr.Preeti, Dr.Sarvamangala, Indrayani, Mugdha and Vineet for their help and cooperation.

It is difficult to imagine a thesis without the full support and understanding of one's family. I express my heartfelt gratitude to my mother Lata Sharma and my sister Shailaja Sharma for their love, constant support and encouragement. I express my warmest feelings for the understanding and patience shown by my husband Shyam and son Pratham during the completion of my thesis. I thank all my teachers, friends, relatives and well wishers, whose names may not have been mentioned here, but whose good wishes and support have enabled me to complete this work.

Date: May 28, 2012
