

List of Tables

Chapter 1:

Table 1.1: Breeding objectives and selection criteria for fenugreek

Table 1.2: Improved varieties in fenugreek

Chapter 2:

Table 2.1: Accessions of *Trigonella* procured from SARDI

Table 2.2: Analysis of morphological characters

Table 2.3: Comparison of morphological features between *T. coelesyriaca* accessions

Table 2.4: Comparison of morphological features between *T. schlumbergeri* accessions

Table 2.5: Key to “medicagoid” species of *Trigonella* (Small 1987-a)

Chapter 3:

Table 3.1: Details of *Trigonella* accessions used in diversity analysis

Table 3.2: Polymorphism data for ISSR primers

Table 3.3: Intraspecific ISSR polymorphism

Table 3.4: Species diagnostic ISSR markers in *Trigonella* species

Table 3.5: Cp SSR primers used, number of alleles (n) and gene diversity values (He)

Table 3.6: Chloroplast haplotypes detected in the genus *Trigonella* using five Cp SSRs

Chapter 4:

Table 4.1: Primer sequence

Table 4.2: Accessions, origin, Numbers of outgroup species

Table 4.3: Length of the sequenced regions

Table 4.4: Intraspecific sequence divergence in ITS and *trnL*-F sequences

Table 4.5: Sequence statistics for separate and combined internal transcribed spacer (ITS), and chloroplast *trnL*-F data sets used in the phylogenetic analysis

Table 4.6: Results of partition-homogeneity test

Chapter 5:

Table 5.1: Bacterial strains used to evaluate antibacterial activity in *Trigonella* and *Medicago*

Table 5.2: Tests for preliminary phytochemical analysis

Table 5.3: Preliminary phytochemical analysis

Table 5.4: Antibacterial activity of *Trigonella* and *Medicago* species

Table 5.5: Quantification of compounds in fraction 6

Chapter 6:

Table 6.1: Fungi used to evaluate antifungal activity in *Trigonella* and *Medicago*

Table 6.2: Antifungal activity of crude methanol extracts of screened *Trigonella* and *Medicago* species

Chapter 7:

Table 7.1: Chromatographic conditions

Table 7.2: Diosgenin content in the aerial parts (leaf +stem) of *Trigonella* and *Medicago* species.

Table 7.3: Diosgenin content in seeds of *Trigonella* species.
