

Abstract

‘Absolute Syntax’ is the sequence in which the facet ideas of a subject arrange themselves in the minds of the majority of persons. So, It is necessary to study the mind of the people. Cognitive Science is the discipline which deals with theory of mind and other mind related matter. The present study tries to identify and critically analyse various cognitive aspects, namely, mode of thinking, language, culture, worldviews of human minds in relation to Absolute Syntax. Uncertainty is the inherent nature of all Information Retrieval Systems. Concludes that Absolute Syntax Research is to be blended with Quantum Cognition.
