List of Table.

**Table 1.1:** organic reactions catalyzed by ionic liquids  
Page no. 2

**Table 1.2:** Optimization of reaction.  
Page no. 12

**Table 1.3:** Water promoted organic reactions.  
Page no. 12

**Table 1.4:** Applications of polymer supported reagent  
Page no. 16

**Table 2.1.1:** Optimization of the reaction conditions a  
Page no. 31

**Table 2.1.2:** Synthesis of 4-aryhexahydro-1H-pyran[2,3-d]pyrimidin-(8aH)-ones(4a-l).  
Page no. 31

**Table 2.2.1:** Synthesis of piperidine under various conditions  
Page no. 42

**Table 2.2.2:** Synthesis of highly substituted piperidine (4a-r).  
Page no. 44

**Table 2.2.3:** Comparison of present method with reported methods.  
Page no. 45

**Table 3.1.1:** Synthesis of substituted pyridine 4a under various reaction condition  
Page no. 59

**Table 3.1.2:** Effect of various solvent on the synthesis of substituted pyridine 4a  
Page no. 59

**Table 3.1.3:** Synthesis of 2- amino 3,5 dicarbonitrile-6-thio pyridines  
Page no. 60

**Table 3.1.4:** Camparision of catalytic activity of TBAB-Cs2CO3 against other reported catalyst for the conversion of benzaldehyde into corresponding substituted pyridine derivative.  
Page no. 61

**Table 3.2.1:** Synthesis of 5a under various conditions  
Page no. 78

**Table 3.2.2:** Multicomponent reaction for the synthesis of Multisubstitute pyridines 5a-n  
Page no. 79-80

**Table 3.2.3:** Optimization of catalyst by different reported methods on the reaction of 4-chlorobenzaldehyde.  
Page no. 81

**Table 3.3.1:** Synthesis of 5a under various conditions.  
Page no. 95

**Table 3.3.2:** Synthesis of 2H-indazole[2,1-b] phthalazine-trione derivatives, by combing TBAB and Cs2CO3 as a catalyst at room temperature (4a-p)  
Page no. 96

**Table 3.3.3:** Literature serve of the synthesis of 2H-indazolo[2,1-b] phthahazine-1,6,11 (13H)-tr trione.  
Page no. 98

**Table 3.4.1:** Optimization of reaction condition in the Synthesis of benzylpyrazolyl coumarin  
Page no. 110

**Table 3.4.2:** Synthesis of benzylpyrazolyl coumarines (5a-k).  
Page no. 112

**Table 3.4.3:** Catalyst optimization by reported methods.  
Page no. 113
Table 4.1.1: Synthesis of benzopyrano [2,3-\textit{b}] pyridine derivatives (4a-k).  
Table 4.1.2: Comparison and optimization of catalyst by reported method.  
Table 4.2.1: Optimization reaction condition.  
Table 4.2.2: Synthesis of 3, 4-dihydropyrano[c] chromene derivatives (4a-m).  
Table 4.2.3: Comparison of present method with reported methods.  
Table 5.1.1: N-formylation of aniline with formic acid in various reaction conditions.  
Table 5.1.2: Effect of various solvents on N-formylation of aniline (1a) (1 mmol) with formic acid (2) (2mmol).  
Table 5.1.3: N-Formylation of secondary amines and anilines with formic acid (3a-v).  
Table 5.1.4: Comparison of some reported methods with present method PEG-HBF₄ solvent free at room temperature.  
Table 5.2.1: \textsuperscript{a}Reaction condition optimization in the tetrahydropyanylation of benzyl alcohol with PEG-HBF₄ at room temperature.  
Table 5.2.2: Synthesis of tetrahydropyanylation from benzyl alcohol and phenol reacted with 3,4-dihydro-2\textit{H}-pyran to give (3a-3q).  
Table 5.2.3: Comparison of some reports on tetrahydropyranylation of benzyl alcohols and phenols  
Table 6.1.1: Effect of Lewis acid in a reaction 1a and 2 to give benzyl acetate 3a (scheme \textit{1})\textsuperscript{a}  
Table 6.1.1: Optimization reaction conditions  
Table 6.1.3: Synthesis of esters using alcohols and acetic acid  
Table 6.1.4: Comparison of catalytic activity of Fe(ClO₄)₂·H₂O catalyst with various catalysts for acetylation from substituted alcohols with acetic acid.  
Table 6.2.1: Synthesized derivatives of acylation by using alcohols and acetic anhydride  
Table 6.2.2: Comparative studies of catalysts with present methods  
Table 6.3.1: Synthesized quinazolines derivatives by using various benzaldehydes  
Table 6.3.2: Comparative studies of catalyst with present methods  
Table 6.4.1: Synthesized derivative of pyranopyrazoles by using various benzaldehyde 5a-m.  
Table 6.4.2: Comparative studies of catalyst with present methods.  
Table 7.1.1: Synthesized derivatives of S-triazine (5a-l).  
Table 7.1.2: Antimicrobial and hemolytic activity of trazine based chalcones
| Table-7.1.3: Anti oxidant activity (DPPH and OH Activity) of S-triazine based variousaldehyde derivatives compare with ascorbic acid |
