ACKNOWLEDGEMENTS

I would like to welcome this opportunity to acknowledge my deepest appreciation and greatest debts to my inspired and patient guide, Professor Dr. Annapurna. M., for all helps she has devoted to this work, and for her priceless and invaluable pieces of advice, and constant sacrifice of time and energy to this study in particular, and during the PhD studies, in general.

I would also like to express my heartiest thanks to the nice lady, someone who has a special place in our heart, Professor Dr. Priti S. Kumar. I am thankful to her not only for her intellectual help, but also for her spiritual support. In fact, she provided me with her scholarly and insightful comments and suggestions during all phases of the study and gave me timely support.

My greatest thanks also go to the tireless and outstanding Professor Dr. B.K.Ravindranath who is concerned about his students. In fact, without his eagle eyes many mistakes and slips might have gone unnoticed.

I would also like to express my greatest appreciation to Dr. Nanjeya for his invaluable comments on reading of my thesis.

I should not forget to thanks all my professors including Dr.Jalilifar, Dr. Hayati, Dr, Shooshteri, Dr. Gorjyan, Dr. Lashkaryan, Dr. Anusheh, Dr. Fazilatfar, and Dr. Islamizadeh.

Last but not least, are my friends and family, especially my kind wife, my clever son and my cute daughter in particular? Many thanks go also to all of them who helped me in the realization of this project.

Finally, I would like to confess that I, alone, am responsible for any shortcoming or imperfection.
