ACKNOWLEDGEMENT

I wish to acknowledge my deep sense of gratitude and sincere thanks towards my supervisor Dr. S. D. Deosarkar, Assistant Professor, School of Chemical Sciences, Swami Ramanand Teerth Marathwada University, Nanded for his invariable, meticulous and valuable guidance. His immense experience and kind support has helped me a lot to solve various problems that I had faced during this research work. I express my sincere thanks to Dr. S.D. Deosarkar for putting trust in me and motivating me to complete this work with immense enthusiasm and utmost perfection and to reach to the newer heights of excellence. I owe this work to him.

My mind is flooded with names of the persons who have helped me directly or indirectly in my research work. It will only be impossible to acknowledge their love and support in just few lines. However, some people do hold special place in this entire journey and I can only thank them with all my heart at this special moment. The very first thanks goes to Prof. Dr. S. S. Makone, Director, of School of Chemical Sciences, for providing all the necessary facilities to carry out the present work.

I am thankful to Prof. Dr. P. K. Zubaidha, Prof. Dr. B. S. Dawne, Dr. O. S. Yemul, Dr. R. H. Tale, Dr. D. S. Wankhede, Dr. G. K. Chaitanya, Dr. A. L. Puyad R. V. Pinjari and Dr. Wanale, School of Chemical Science, Swami Ramanand Teerth Marathwada University, Nanded for their encouragement. We hardly notice the helping hand that the non-teaching staff lend us continuously, but it is only their selfless help and support that minimize the hurdles in day-to-day working. I thank entire non-teaching staff of School of Chemical Sciences for being there for me always.

I am thankful to Dr. M. L. Narwade for his constant and valuable guidance.
Many challenges in research are fetched due to constant support and special cooperation from some people and institutes. Arranging the drug samples needed for this work was one such great challenge, but Wockhardt Ltd., Aurangabad, Cipla Pharmaceuticals Ltd., Mumbai, and Dr. T. M. Kalyankar helped me crack it by making available drug sample. It has indeed been a valuable gift. I am also thankful to Dr. A. P. Gingine, Dr. Sachin Narangale and Mrs. Shweta Pendse for their constant encouragement.

‘Thanks’ may seem a very small and plastic word for the people who have been with me in every moment. They have made the long laboratory hours pass just like a moment. We worked, we discussed, we argued, we inferred, we motivated, in short, we have lived every moment of this research work together, all these years. Mr. Atmaram Arsule, Mr. Sandip Deoraye, Mr. Rajendrakumar Sawale, Ms. Meenakshi Pawar and Ms. Shubhangi Pawde you have been great colleagues and above all fantastic friends and great support. May we always work together!

There are number of loving people who have contributed in my research work and I express my heartfelt apology for my inability to mention each one of them here.

Last but not the least, my eternal support and strength, my family, who has stood before me to make me stand like a rock, in every shaky moment. How can I thank them enough? I can never forget the sacrifices made by mother, father and sister all throughout this journey.

Mr. Prashant D. Tawde
