ACKNOWLEDGEMENT

At the onset, I bow my head at the feet of the Almighty Father for giving me strength to accomplish this task under all circumstances.

My sincere gratitude to my supervisor Prof. Gul Mathur for her patience, motivation, enthusiasm, and immense knowledge throughout my research work. I could not have imagined having a better advisor and mentor for my Ph.D study.

I was extremely fortunate to be a part of the Department of Home Science, DEI. The head of the Department, Prof Ravi Sidhu and teachers Dr. Sangita Saini, Dr. Seema Kashyap, Mrs. Madhulika Gutam, Mrs. Richa Verma and other members of the department have always been very helpful and supportive in various ways.

My heartfelt thanks to Dr. Gopi Chand Gupta, who besides allowing me to conduct the intervention programs on his patients in his clinic, helped me in innumerable ways and very patiently satisfied all my queries regarding the medical aspect of the work. In spite of his high standing, Dr. Gopi is very affectionate, humble and helpful. Dr. Gopi is an M.D from Brookdale Hospital and University he has served for 13 years in New York Hospital and Cornell and Bill Roger’s Rehabilitation center in New York. He has been Director of Pulmonary Function Laboratory at Montrose Veteran’s Administration hospital New York and is at present a renowned lung specialist of Agra city. I must admit that my study would not have been possible without his noble support.

My sincere thanks to Dr. Vijay Kumar, the Advisor of Medical Education and Health Care Practices, D.E.I, Deemed University, Dayalbagh, for granting me permission to work on the patients of Saran Ashram Hospital (Charitable Hospital of Dayalbagh).
Words fail to express my appreciation to ‘Cipla’ who agreed to organize free health check up and for providing their equipment at the venue. Mr. Prashant, who worked as a physiotherapist in the intervention program also needs special thanks for making the rehabilitation program advantageous to the patients.

All those patients who trusted me and let me work with them need extra thanks. Without their cooperation my work could not be in the form it is today.

I owe thanks to the central Library of Dayalbagh Educational Institute, Library of Punjab Agriculture Institute, library of All India Institute of Medical Sciences (AIIMS) for allowing me to collect secondary data for my research.

Prakash Mathur sir who was a caring and a loving guardian during the whole term of my research deserves special thanks.

I would like to thank my Father-in-law(R.N Singh), Mother-in-law(Savitri Singh), Sister-in-law and Brother-in-law who have supported me throughout my work.

My parents (Vinod Singh and Renu Singh), grandparents (Jitendra Singh and Urmila Singh) and my uncle aunty(Yashwant Singh and Nutan Singh) who have inculcated in me the thirst for knowledge. My brothers and sisters, nieces and nephews who were always there with love and blessings, needs sincere thanks from the core of my heart.

My dear friends Juhi-Paras, Neha-Amit, Jassi-Asvinder, Rajni-Abhay, Deekhsa, Dr. Jaishree Sharma, Arpita, Abhishek, Uttara, Nikhil-Anuradha Priyanka and Mukul made my research more enjoyable by providing loving care and support and were always ready to boost me when I felt low.

My dearest Garima whose unconditional support gave me the strength to accomplish this difficult task deserves my sincere thanks. Garima was with me throughout the duration of my work. Her pleasant and jolly nature was a continuous motivation to me.
I am unable to find suitable words to thank Anoop, my dear husband who let me stay away just after fifteen days of our marriage for the sake of my research work. Words alone cannot express what I owe them for their encouragement and whose patient love enables me to complete this work.

Thank you.

ALKA SINGH
