LIST OF FIGURES

Figure 2.1 Schematic representation of quorum sensing circuits of *S. mutans* and blocking the communication with inhibitors..........................14

Figure 3.1 Binding of ComAI with PEP domain of ComA...........................25

Figure 3.2 Schematic 2D representation of interaction of derivatives of ComAI with PEP domain of ComA.................................................................26

Figure 4.1 Synthesis scheme of 1,3 – disubstituted ureas...........................31

Figure 4.2 Effect of ComAI treatments alone as well as in synergy on *S. mutans* MTCC 497 biofilms.................................................................47

Figure 4.3 Effect of ComAI treatments alone as well as in synergy on *S. mutans* 5SM (clinical isolate) biofilms.................................................48

Figure 5.1 qRT-PCR analysis of various genes involved directly and indirectly in quorum sensing circuit of MTCC 497 (*S. mutans*).........................60

Figure 5.2 qRT-PCR analysis of various genes involved directly and indirectly in quorum sensing circuit of clinical isolate SM4 (*S. mutans*)..................62

Figure 5.3 Viability of HepG2 cells after 24 hour treatment..........................64

Figure 5.4 Incidence of dental caries..............................................................66

Figure 5.5 Anti-adherent activity of ComAI in treated groups......................67

Figure 5.6 Hematoxylin and eosin staining of liver tissue............................68

Figure 5.7 Hematoxylin and eosin staining of dental tissue.........................69

Figure 5.8 qRT-PCR analysis of inflammatory markers in liver tissues of Wistar rats.................................................................70
Figure 5.9 qRT-PCR analysis of inflammatory markers in samples collected from blood plasma of Wistar rats...........................71
