<i>DECLARATION</i>		<i>I</i>
<i>CERTIFICATE</i>		<i>II</i>
CHAPTER 1 INTRODUCTION	1	
1.1 Introduction	1	
1.2 Continuum Nature of Fluid	3	
1.3 Types of Fluid	3	
1.4 Types of Flow	6	
1.5 Governing Equations for Viscous Fluid Flow	7	
1.6 Flow through Porous Media	10	
1.7 Magnetohydrodynamics and its Applications	11	
1.8 Dimensional Analysis	12	
1.9 Non-Dimensional Parameters	13	
1.10 Composition of Blood	18	
1.11 Physiological Properties of Blood	19	
1.12 Functions of Blood	20	
1.13 Theories Related to Flow of Blood	21	
1.14 Cardiovascular Disease and Blood Flow	25	
1.15 Models of Blood Flow	28	
1.16 Brief Description of the Methods of Solutions used in the Thesis	31	
1.17 Review of Literature	37	
1.18 Summary of the Thesis	40	
CHAPTER 2 PULSATILE BLOOD FLOW THROUGH STENOSED ARTERY WITH AXIAL TRANSLATION	43	
2.1 Introduction	43	
2.2 Formulation of the Problem	45	
2.3 Method of Solution	47	
2.3.1 Shear Stress	51	
2.3.2 Wall Shear Stress	51	

2.3.3 Average Wall Shear Stress	51
2.3.4 Oscillatory Shear Index	51
2.3.5 Relative Residence Time	52
2.3.6 Computation of Fourier's Harmonics A_n and B_n	52
2.4 Results and Discussion	53
2.5 Conclusions	54

CHAPTER 3 PULSATILE FLOW OF BLOOD THROUGH AN ARTERY 65 WITH NON-DARCY POROUS MEDIUM STENOSIS IN THE INFLUENCE OF AN INCLINED MAGNETIC FIELD

3.1 Introduction	65
3.2 Formulation of the Problem	66
3.3 Method of Solution	68
3.3.1 Solution for mean flow velocity	70
3.3.2 Solution for Transient flow	72
3.3.3 Wall Shear Stress	74
3.3.4 Average Wall Shear Stress	74
3.3.5 Oscillatory Shear Index	75
3.3.6 Relative Residence Time	75
3.4 Results and Discussion	75
3.5 Conclusions	77

CHAPTER 4 PULSATILE MHD ARTERIAL BLOOD FLOW IN THE PRESENCE OF DOUBLE STENOSES

4.1 Introduction	85
4.2 Formulation of the Problem	86
4.3 Mathematical Analysis	88
4.3.1 Volumetric Flow Rate	92
4.3.2 Shear Stress	93
4.3.3 Wall Shear Stress	93
4.3.4 Wall Shear Stress Gradient	93
4.4 Results and Discussion	94
4.5 Conclusions	95

CHAPTER 5 NON-NEWTONIAN FLOW OF BLOOD THROUGH AN INCLINED ARTERY WITH OVERLAPPING STENOSIS AND DILATATION

5.1	Introduction	105
5.2	Formulation of the Problem	106
5.3	Method of Solution	109
5.3.1	Skin friction	110
5.3.2	Volumetric flow rate	111
5.3.3	Pressure drop	111
5.3.4	Impedance	112
5.4	Results and Discussion	112
5.5	Conclusions	114

CHAPTER 6 UNSTEADY CONVECTION AND DIFFUSION IN A STENOSED ARTERY WITH BOUNDARY ABSORPTION

6.1	Introduction	125
6.2	Formulation of the Problem	127
6.3	Mathematical Analysis	128
6.3.1	Method of Solution	129
6.4	Results and Discussion	135
6.5	Conclusions	136
