

# LIST OF FIGURES

---

Figure #	Title	Page #
1.1 – 1.6	Shikonin producing plant species, their root and purified shikonin powder	3
1.7	Chemical structure of shikonin	4
1.8	Chemical structure of shikonin derivatives	5
1.9	Multifaceted physiological role of Shikonin	7
1.10	Steps of cancer progression	8
1.11	Pathogenesis of inflammation	10
1.12	Type 1 and Type 2 Diabetes	11
2.1	Production of shikonin in hairy root cultures of <i>Arnebia hispidissima</i> after <i>Agrobacterium rhizogenes</i> -mediated genetic transformation	18
2.2	Schematic signaling pathways induced by shikonin in apoptosis	21
2.3	Schematic signaling pathways induced by shikonin in inflammation.	27
2.4	Schematic signaling pathways induced by shikonin in metabolic disorders	34
2.5	Types of ion channels present on DRGs	39
3.1	Vector Map of (a) pIRESpuro3 (b) pcDNA4/myc-HisB	57
3.2	Screening of recombinant clone	59
3.3	Confirmation of recombinant clone by restriction digestion	59
3.4	Intracellular calcium mobilization assay principle	62
3.5	Intracellular cAMP accumulation assay principle	64
3.6	Ion channel assay principle	65
3.7	Enzyme inhibition assay principle	66
3.8	Radioligand binding assay principle	67

---

Figure #	Title	Page #
3.9	NRF2 ARE bla assay principle	69
3.10	Cellular events in cell migration	70
3.11	CellTiter -Glo Luminescent Cell Viability Assay principle	71
4.1	Shikonin dose response curve in intracellular calcium assay on B1/CHO-K1 cells	76
4.2	Shikonin dose response curve in multiple recombinant cell lines in intracellular calcium assay	77
4.3	Screening of shikonin on over expressed mammalian cells in cAMP assay	78
4.4	Shikonin dose response curve on N1E115 cells.	79
4.5	Shikonin dose response curve on NaV1.7/HEK -293 cells	80
4.6	Shikonin inhibition curve with FLT3 and TrKA enzyme	81
4.7	Effect of perisciatic injection of shikonin in rat pinch pain model.	84
4.8	Shikonin reduced mechanical hyperalgesia in inflammatory pain models in rats through intraperitoneal administration.	86
4.9	Efficacy of shikonin in mechanical hyperalgesia in inflammatory pain models in rats through oral administration	87
4.10	Effect of shikonin in formalin induced pain model in rat	88
4.11	Shikonin dose response curve in intracellular calcium assay on Orexin-1/CHO-K1 and Orexin-2/CHO-K1 cells	91
4.12a	Effect of shikonin on inflammation targets	93
4.12b	Effect of shikonin on CRTh2 over expressed cells, evaluated in intracellular cAMP assay	94
4.13a	Effect of shikonin on inflammation targets in calcium assay	95
4.13b	Effect of shikonin on CXCR2/U937 cells	96
4.13c	Effect of shikonin on human neutrophils endogenously expresses CXCR2 receptors	97
4.14	Effect of shikonin on freshly isolated human neutrophils in IL8 induced migration assay	98
4.15	Effect of shikonin in ARE-bla HepG2 reporter gene assay	99

---

<b>Figure #</b>	<b>Title</b>	<b>Page #</b>
4.16	Shikonin dose response curve in intracellular calcium assay on AT1/CHO-K1 cells	101
4.17	Cytotoxic effect of shikonin on mammalian cancerous cell lines at varying incubation time in MTS cell viability assay	103
6.1	Graphical summary of research done on shikonin to analyze its anti-nociceptive and analgesic properties	122
