

## **LIST OF TABLES**

<b>Table No.</b>	<b>Title of Table</b>	<b>Page No.</b>
1	Major producers of papaya in the world	1
2	Area, output and yield of papaya in India	2
3	State wise area, output and yield of papaya	3
4	India's country-wise export of fresh papaya	4
5	Composition of fresh fruit of papaya	8
6	Effect of harvesting day on morphological characteristics of papaya	61
7	Effect of harvesting day on weight, volume and density	62
8	Effect of harvesting day on pulp weight, peel weight and seed weight	63
9	Effect of harvesting day on fruit characteristics	65
10	Chemical composition of papaya fruit pulp Cv. Taiwan 786	67
11	Effect of pre treatments on storage behavior of papaya fruit stored at ambient temperature (25-28°C)	68
12	Effect of pre treatments on visual observations of papaya stored at ambient temperature	69
13	Physiological loss in weight of fruits stored at ambient temperature	73
14	Effect of pre treatments on T.S.S. of papaya stored at ambient temperature	77
15	Effect of pre treatment on percent titratable acidity of papaya stored at ambient temperature. (25-28°C)	80
16	Effect of pre treatments on pulp/peel ratio of papaya stored at ambient temperature	83
17	Effect of pre treatments on sensory evaluation of papaya fruit stored at ambient temperature	87

<b>Table No.</b>	<b>Title of Table</b>	<b>Page No.</b>
18	Effect of refrigerated storage temperature on storage behavior of papaya	88
19	Effect of refrigerated storage temperature (0- 4°C) on visual observation of papaya	90
20	Effect of refrigerated storage temperature (0- 4°C) on physiological loss in weight (percent)	91
21	Effect of refrigerated temperature (0- 4°C) on total soluble solids of papaya	92
22	Effect of refrigerated temperature (0 - 4°C) on percent titratable acidity of papaya	93
23	Effect of refrigerated temperature (0- 4°C) on pulp/peel ratio of papaya	94
24	Effect of refrigerated temperature on sensory evaluation of papaya fruits	95
25	Effect of cold storage temperature (8±1°C) on storage behavior of papaya fruits	96
26	Effect of cold storage temperature(8°C±1°C) on visual observation of papaya	97
27	Effect of post harvest temperature (8°C±1°C) on total soluble solids on papaya	100
28	Effect of cold storage temperature (8°C±1°C) on percent titratable acidity	101
29	Effect of cold storage temperature (8°C±1°C) on pulp/peel ratio	102
30	Effect of cold storage temperature (8°C±1°C) on sensory evaluation of papaya	103
31	Effect of harvesting stages on fruit weight	104
32	Effect of harvesting stages on fruit skin color	105
33	Effect of harvesting stages on pulp weight	105
34	Effect of harvesting stages on pulp percent	106
35	Effect of harvesting stages on peel weight	106
36	Effect of harvesting stages on peel percent	107

<b>Table No.</b>	<b>Title of Table</b>	<b>Page No.</b>
37	Effect of harvesting stages on pulp-peel ratio	107
38	Effect of harvesting stages on seed weight (g)	108
39	Effect of harvesting stages on pulp colour	108
40	Effect of harvesting stages on chemical composition	109
41	Effect of harvesting stages on hardness of papaya fruits	111
42	Effect of harvesting stages on sensory evaluation of Jam	112
43	Chemical composition of papaya fruit pulp (cv. Taiwan 786) used for preparation papaya leather	113
44	Percent yield of papaya leather as influenced by different treatments	113
45	Effect of treatments on organoleptic evaluation of papaya leather	114
