ACKNOWLEDGEMENT

This dissertation is not only a signature of my research or the skills at keyboard but resembles a milestone in almost a year short of a decade spent at Jadavpur University; more specifically in the Department of Computer Science and Engineering. My attachment with Jadavpur University is since my post graduate days with the last half a decade entirely dedicated to doctoral research. Since my first days at Jadavpur University, starting in July of 2007, I have been encouraged to find the ‘me’ in myself. With the knowledge filled lecture sessions of extremely qualified professors and sustained assistance, I not only tasted the beauty of Computer Science but also was motivated to pursue my research in the same domain. This thesis is also the summarization of all the experiences I have gained in the university and from substantial number of remarkable individuals in my life.

First and foremost, I would like to thank my research advisor, Prof. Atal Chaudhuri, Dept. of Computer Science and Engineering, Jadavpur University, who was the then Head of Dept. at the time of my joining Jadavpur University. From the initial days, he has been highly supportive in my endeavor for a research topic. He never said me ‘no’ in my amazing journey, right from the selection of a research topic to the completion of this thesis and in between. Even during my post graduate research under his guidance, he instilled high confidence in me and motivated me for further research. He has not only been my research advisor, but also my source of inspiration in troubled times. At times, when I did get low, his specific set of words – “Carry on, I am with you” gave me the much needed oxygen for me to get motivated. In short, he has not only guided my research but also provided academic and emotional assistance through the rough path of this present research completion. Thank You Sir.

I would like to express my gratitude towards my thesis committee, Prof. Mita Nasipuri, Prof. Debesh Kumar Das, Prof. Suranjan Ghose, Prof. Aditya Bagchi (Ex. Indian Statistical Institute) and Prof. Samiran Chattopadhyay (Dept. of IT, Jadavpur University) for assisting me in times of my hardships. I would like to thank Prof. Debesh Kumar Das, Head of Dept., Computer Science and Engineering, and Prof. Sivaji Bandyopadhyay, Dean, Faculty of Engineering and Technology, Jadavpur University for providing me with all the assistance for pursuing my research work. My growth of knowledge would not have been possible without the sessions and discussions with my respected professors.
My quality time at Jadavpur University was made enjoyable in large part due to the many friends who became part of my life. I would like to specifically thank Dr. Pinaki Bhaskar (a part of my family) for his constant encouragement for pursuing research. He never stepped back from providing me with reliable assistance and discussing technical solutions in spite of his tough schedule. I highly appreciate the camaraderie and programming expertise of Ms. Anisha Majumder and Mr. Sourav Shikdar for whom nothing was impossible to code. On the same note, I would also like to thank Mr. Sourish Jana and Mr. Rakesh Halder.

Dozens of people have helped me immensely at Jadavpur University. I would like to thank Mr. Prabhat Chatterjee, Mr. Dilip Lodh, Mr. Kamal Kanti Ghoshal, Mr. Niloy Das and Mr. Parimal Chakraborty for all the happy moments spent together.

Out of university, in my personal life, I have been highly supported in various means by a handful of quality friends upon whom I can always depend. Mr. Jyotirmoy Gupta, Mr. Amit Kumar Majumder, Dr. Anil Kumar Bag and Mr. Debabrata Mondal, I thank you all highly as you all have never let me break down and were always there when I needed most.

I conclude this portion with my family, the basic source of sustenance of life. I thank my parents, Mr. Dilip Kumar Sengupta and Mrs. Swapna Sengupta for believing in me, educating me and providing me with all the amenities to grow up into an educated human being. I still remember my aunt, Mrs. Jhumjhum Chaudhuri, asking me whether I wanted to pursue PhD and kept on motivating me for further research since my post graduate days. I thank my brother Mr. Tanbir Ahammed for always being supportive in my times of need. I thank my parent in laws, Sk. Golam Mohobub and Mrs. Gulnahar Begum, my brother in laws Mr. Mustak Rased and Mr. Mamun Rased and my sister in laws, Dr. Mafruza Sultana, Ms. Masuma Sultana and Ms. Marsina Sultana for believing in me.

Finally, I would like to mention the names of those two persons in my life who are the very reasons for my existence. With sufficient lack of words, I would like to mention the support, patience, endurance, sincerity, affection, belief and confidence shown by my wife, Mrs. Mahamuda Sultana, towards me which was the source of my perseverance in my doctoral journey. She has been the calm and motivating witness of my effort, failure, anger, determination and eventual success in my troubled times. I owe my patience elevation to my five year old son, Master Ryne Sengupta, who taught me to see
things differently, see the world differently, and approach a specific problem in a simple perspective.

In my wonderful journey of my doctoral research, I have witnessed a plethora of notable individuals who supported and motivated me towards success. Some of them I have mentioned and the rest remain in my mind unforgotten for the rest of my life.
