Acknowledgements

First and foremost, I would like to express my deep and sincere gratitude to my supervisor, Dr. P. Raveendran, Associate Professor, Department of Chemistry, University of Calicut. He has provided constant support, encouragement, guidance, advice, and care, throughout my research period. I am fortunate to have an opportunity to work under his supervision and I thank him for giving me the confidence to finish this thesis.

I thank Prof. K. Krishnankutty, Former Head, Department of Chemistry, University of Calicut, for all his advice and support during my research work.

My sincere thanks are due to Prof. K. K. Vijayan, Department of Chemistry, University of Calicut, for his encouragement and keen interest in my work.

I wish to place on record my gratitude to Prof. V. M. Abdul Mujeeb, Head, Department of Chemistry for his support. I also thank the members of the Chemistry faculty, Prof. M. P. Kannan, Prof. K. K. Aravindakshan, Prof. P. Mohamed Shafi, Prof. T. Gangadevi, Prof. E. Purushothaman, Dr. Abraham Joseph, Dr. D. Bahulayan, Dr. N. K. Renuka, Dr. M. T. Ramesan and Dr. Pradeepan Periyatt for their support.

I thank Dr. M. Eswaramoorthy, JNCASR, Bangalore, for his valuable suggestions and help to carry out SEM, TEM and Surface Area measurements.

I am thankful to Dr. K. V. G. Krishnamoorthy, AU-KBC, Chennai, for his support and help to carry out AFM measurements.

I wish to thank Dr. K. V. Lazar, Department of Zoology, University of Calicut, for his help to carry out the antibacterial studies.

I thank Dr. Resmi M. R., Assistant Professor, Govt. Sanskrit College, Pattambi, for her valuable advice and friendship throughout and help to carry out catalytic activity studies.

I am thankful to Prof. K. M. Leelavathy for the support and encouragement extended throughout.
I thank all the non-teaching staff, Department of Chemistry for their and co-operation. My thanks are due to Dr. K. V. Balakrishnan for his support. I also thank Mashhoor, K. Research Scholar, Department of Zoology for his support.

It is my pleasure to thank all my friends and research scholars, Department of Chemistry, University of Calicut, for their support. In particular, I would like to thank Mehar, Shijina, and Mity for their unconditional love and support. My special thanks are also due to Arun, Shinu, Divya, Praveen and Bincy, for their support.

I greatly value the friendship and support extended to me by the members of our research group: Sumitha, Jasmine, Anju, Nisi, Jai Thomas, Vineeth, and Rasheeda.

I wish to remember with great sense of gratitude the support, patience and understanding extended to me by my mother, sisters and their families throughout. Without their encouragement and understanding it would have been impossible for me to finish this work.

My loving thanks to my daughter Pooja, who is the inspiration and light in my life. She encouraged, supported, and understood me in her own way throughout.

Finally, I fondly remember my father, Prof. K. Unnikrishnan, whom I lost during my first year at the University. He has been the perennial source of love, affection, encouragement, help, and support throughout my life. He would have been the happiest person seeing my completing this work and I am deeply indebted to him.
