ACKNOWLEDGEMENTS

First and foremost, my enormous gratitude to almighty God for helping me through ups and downs all my life. I would like to express my heartfelt gratitude to my Biology tutor Mrs. Sadhana Parekh for creating a spark in me to pursue my career in Biology. The Director of TSR and TBK Degree College, Visakhapatnam, Mr. T. Balaramkrishna deserves a big thanks for giving me an environment where I could grow learning and acquiring good knowledge of the subject. My sincere gratitude to Biotechnology lecturer Mrs. Salome at the same college for making me understand the basics of biotechnology so well. I extend my gratitude to my Immunology lecturer Mrs. Kavitha at Vellore Institute of Technology, Vellore who drew my attention to the practical aspects of molecular biology and immunology which ultimately led my interest in wet lab research. I have no words to thank my Connexios family (The most friendly workplace ever) especially, Dr. Venkatranganna, every member of the screening team supervised by Dr. Anil and Dr. Somesh for teaching me the basic research and helping me all the time. When I am in need of some help, the first to knock my mind is Connexios. Thanks to all of you for being there!

Many thanks to Bhawna for introducing me to SORM. My PhD journey was very difficult to begin at SORM but my guide made it possible, I would like to express my deepest thanks to my Research guide, Dr. Ramesh Bhonde for giving me an opportunity to be one among the last batch of his PhD students. His constant support during my PhD study and research, his motivation and most importantly his positivity has made me complete my PhD work peacefully. His guidance helped me all through the research work to writing this thesis. I could not have imagined having a better guide and mentor
for my PhD study. I would like to express my sincere gratitude to Dr. Anujith Kumar, my Doctoral advisory committee member and my mentor when my guide was unavailable for fixing even smallest of the problems. His guidance and suggestions are highly appreciated. I would like to thank Dr. Anandh, my Doctoral advisory committee member for his valuable suggestion and advice all through the research period. My thanks are also due to Dr. Gopal Pande, Professor and Dean of SORM for his key advices during the completion of research work and selecting me for internship at Instem, Bangalore. My special thanks to Dr. Jyothi Prassanna for giving kind advices for the conclusive remarks of the thesis.

I am very thankful to Dr. Suman from Karnataka College of Pharmacy for helping me by giving Plethysmometer and the guideline to use it. Special thanks to Dr. Indrani Datta, NIMHANS, Bangalore for guiding me through the last set of cell tracking experiments. Thanks to Pradnya for helping me with the imaging. My deepest thanks to Dr. Thej, BGS hospital, Bangalore for neat and beautiful sections of the animal tissues for histopathological analysis. My genuine thanks to Dr. Rukmini, Mythreyi and Shalini, ACTREC, Tata Memorial Hospital, Mumbai for the help and clarifying all my doubts in no time. My value added thanks to Rosa, Indian Institute of Science (IISc), Bangalore for the animals and helping me during tough times at IISc.

I run out of words to thank my best colleague, Sunil for helping me going out of his way for all my *invivo* experiments, especially during the termination of the experiment. Animal experiments would not have been so successful without him. Thanks for being there! My warm thanks to Smitha for helping me with the flow cytometry experiments. It would have been a boring time at SORM without Chaitra, Ashwini and
Smitha. Thanks for all the unforgettable memories (especially, on the lunch table and valley flat). I would like to thank Charan, for being the last hope for giving me cells when I desperately needed them. I would like to thank Suja Ann for dedicating so much of her time motivating and directing me in thesis writing. It was much easier because of her suggestions. Lots of thanks to Vaishali (especially for the discussions during the last few days), Sowmya, Anoop, David, Shashank, Dhanya and Sivapriya for helping me anytime I asked for. A very special gratitude goes out to all down at SORM and MAHE for helping and providing the funding for the work. It was great sharing laboratory with all of you during the last four years.

_Sometimes being with your friends, is all the therapy you need._

My heartfelt thanks to my best friend for life Diya and Sohali. I thank you my friend Nithya, for listening to all the crap with so much of interest. A bunch of my friends _viz._ Sunil, Nithya, Sachin, Bharath and Naveen in different combinations were my stress reliever throughout. Thanks to each one of you for the limitless laugh, countless memories and endless friendship.

Last but by no means least, I would like to thank my whole family especially my brother in law Mayank for supporting me in times of crisis and my life in general. My wholehearted thanks to my brother Manikant, my sister in law Prema for all the tasty food and Namit for entertaining me all the time. I would like to extend my thanks to my brother Avneesh for being there, Tanvi and Aunty Manju for delicious food and good time over almost all the weekends.

Thanks for all your encouragement!

_(NITYA SHREE)_
