# LIST OF FIGURES

| Figure 1: Cellular subsets within the SVF | ...09 |
| Figure 2: Adipose tissue depot | ...16 |
| Figure 3: Adipokines secreted by adipose tissue | ...17 |
| Figure 4: Chronic over nutrition induces uncontrolled inflammatory response leading to metabolic syndrome | ...23 |
| Figure 5: Diagrammatic representation of our hypothesis | ...34 |
| Figure 6: Experimental design for Chapter 3 | ...49 |
| Figure 7: ADSCs and its characterization | ...50 |
| Figure 8: Hypertrophy in 3T3L1 cells | ...51 |
| Figure 9: Glucose uptake in 3T3L1 cells | ...51 |
| Figure 10: 2-NBDG uptake in C2C12 cells | ...52 |
| Figure 11: Adipogenesis in 3T3L1 cells | ...52,53 |
| Figure 12: Intramuscular triglyceride accumulation in C2C12 cells | ...54 |
| Figure 13: Gene expression pattern in 3T3L1 cells | ...55 |
| Figure 14: Gene expression pattern in C2C12 cells | ...56 |
| Figure 15: Western Blotting | ...57 |
| Figure 16: Experimental design for Chapter 4 | ...62 |
| Figure 17: Graphs representing levels of IL10 in the conditioned media | ...63 |
| Figure 18: Measurement of paw volume using plythesmometer | ...63 |
| Figure 19: Images showing paw oedema after 24h of Carrageenan injection | ...64 |
Figure 20: Histological examination of the paw .......................................................... 64
Figure 21: Serum Interleukin-6 ELISA measured as ng/ml ............................................. 65
Figure 22: Experimental design for Chapter 5 ............................................................... 68
Figure 23: Different parameters for randomization proportional to tolerance .............. 69
Figure 24: Body weight at the end of the study ......................................................... 70
Figure 25: Glucose levels in all the groups of mice ..................................................... 70
Figure 26: Oral glucose tolerance test (OGTT) in all the groups of mice ................... 71
Figure 27: Bar graph showing levels of insulin at the end of the study ...................... 71
Figure 28: Lipid profile in all the groups of mice ....................................................... 72
Figure 29: Bar graph showing IL6 levels in the serum at the end of the study .......... 73
Figure 30: Bar graph showing triglyceride levels in the liver tissue at the end of the study ............................................................................................................................. 73
Figure 31: Assessment of insulin resistance .............................................................. 74
Figure 32: Representative images of H&E staining of different tissues ................. 74, 75
Figure 33: Illustrative image of skeletal muscle tissue immunohistochemistry ......... 76
Figure 34: miRNA-206 expression level and protein content of the skeletal muscle .... 77
Figure 35: Gene expression pattern in skeletal muscle and liver tissue ................. 77, 78
Figure 36: Experimental design for Chapter 5 ............................................................. 83
Figure 37: Body Weight measurements ..................................................................... 84
Figure 38: Fasting Glucose levels ............................................................................. 84
Figure 39: Status of lipids in serum .......................................................................... 85
Figure 40: Insulin levels in the serum ....................................................................... 85
Figure 41: Interleukin-6 levels in the serum .............................................................. 86
Figure 42: Assessment of Insulin resistance ............................................................. 86
Figure 43: Gene expression Profile ......................................................................... 87
