

## LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1.1	Total prevalence of dementia in China, India and other region from year 2005-2050	2
1.2	Prevalence of Dementia in India by 2010	3
1.3	Change in number of deaths, 2000-2008	4
2.1	Brain image showing different lobes of brain and their functions	14
2.2	Different Risk factors for developing AD	16
2.3	Pictorial representation of neurons showing differences in alzheimer and normal brain	18
2.4	Cleavage of amyloid precursor protein (APP)	21
2.5	Acetylcholine activity at presynaptic neuron	22
2.6	Oxidative stress leading to neurodegeneration	24
2.7	Mitochondrial dysfunction and oxidative stress	26
3.1A	Flowchart representing followed methodology for ADA genes	36
3.1B	Flowchart representing followed methodology for Obesity genes	36
3.1C	Flowchart representing followed methodology for Sex-associated genes	37
3.2	Pictorial representation of CD-Hit	39
3.3	Pictorial representation of PANTHER	40
3.4	Whole transcriptome analysis pipeline	41
4.1	Bar graph representing no. of ADA genes classified into molecular function based annotation	48
4.2	Bar graph representing no. of ADA genes (40 genes and above) classified into biological process based annotation	48
4.3	Bar graph representing no. of ADA genes classified into cellular component based annotation	49
4.4	Pie chart representing pathways in which ADA genes (22 or above) genes categorize	50
4.5	Pie chart representing Protein classes in which all ADA genes classify	51

<b>4.6</b>	ADA gene up-regulated in all diseased samples	56
<b>4.7</b>	ADA genes down-regulated in all diseased samples	57
<b>4.8</b>	ADA genes down-regulated in diseased frontal and temporal lobe of AD brain	57
<b>4.9</b>	Venn diagram showing number of genes of AD and obesity taken for the study	59
<b>4.10</b>	Pie chart depicting pathways in which common AD and obesity genes were clustered	60
<b>4.11</b>	Bar graph representing no. of obesity genes classified into molecular function based annotation	68
<b>4.12</b>	Bar graph representing no. of obesity genes classified into biological process based annotation	68
<b>4.13</b>	Bar graph representing no. of obesity genes classified into cellular component based annotation	69
<b>4.14</b>	Bar graph representing no. of obesity genes classified into protein classes	70
<b>4.15</b>	Venn diagram representing no. of X, Y, Mitochondria and sex-biased genes taken for the study	71
<b>4.16</b>	Pie chart representing type of Differentially Expressed Sex-associated genes	72
<b>4.17</b>	Expression of MT-TI gene in different Brain Regions	77
<b>4.18</b>	Pie chart depicting molecular function based functional annotation of sex-associated genes under study	80
<b>4.19</b>	Bar graph representing no. of sex-associated genes classified into biological process based annotation	80
<b>4.20</b>	Bar graph representing no. of sex-associated genes classified into cellular component based annotation	81
<b>4.21</b>	Bar graph representing no. of sex-associated genes classified into protein classes	82
