Acknowledgement

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give thanks are particularly mentioned here.

Foremost, I would like to express my sincere gratitude to my advisor and former HOD, Prof. Shibani Chaudhury for the continuous support for my Ph.D study and research, for her patience, motivation, enthusiasm, and immense knowledge. Her scientific temperament, scrupulous thinking and scholarly expertise were invaluable. Her guidance helped me during the time of my research and writing of this thesis. She provided me with the direction, technical support and facilities necessary for my work. She has always given me ample liberty to express my views and experiments with my own ideas. Her affection and hearty co-operation throughout this study has laid the foundation for a personal camaraderie beyond the teacher – student relationship which I will cherish for rest of my life. I could not have imagined having a better advisor and mentor for my Ph.D study.

I am extremely grateful to my HOD Dr. Pratap K. Padhy, Department of Environmental Studies, for his valuable suggestions during various stages of my work and providing me the laboratory facilities necessary to carry out this work. He was always ready to help with his valuable suggestions during my work.

My sincere thanks also go to Dr. Pulak K. Patra, Associate Professor, and Dr. S. Balachandran, Assistant Professor, Department of Environmental Studies for their encouragement and support at several stages of my work. His silent working style and sound knowledge of subject always made me surprised and enriched throughout the period.

A special thanks to Dr. G. N. Chattopadhyay, Scientist, Soil Science Laboratory, PSB, Visva Bharati for being my path finder, giving me valuable suggestions and encouragement at several stages of my work. He is the one with whom I have started working in this field of soil science and during my M.Sc project time.

I would like to thank all my seniors Dr. Pravasini di, Manoj da, Dr. Anil K Mathew, Manash da, Abhijit da, Sukanta da, Subhojit da, Tanmay
da and Dr. Sambhu da for helping me out in paper writing at the initial period.

My special thanks to all my lab mates, co-workers and juniors Indranil, Suraj, Utpal, Rumi, Balwant, Priyanka, Dipti, Indrani for their constant support, knowledge sharing and help in various period during my Ph.D work.

My Special thanks to Dr. Debopriya di, Debashree, Chandan, Suparna, Renuka, Moumita, Purbita, Preetam, Subhadra, Laxmiram and Astomani for their constant support, knowledge sharing and help in various period of my Ph.D work. Without them it was difficult to work and enjoy the laboratory environment for such a long period.

I am thankful to all the non-teaching staffs Late Rajkumar da, Dilip da and Prabir Dey, for their help in laboratory and departmental works.

A special mention is important for Mr. Bikash Chakroborty and Mrs. Rani Kisku who helped me to maintain the plants for a long period.

I am extremely thankful to my Uncle, brothers and my other family members for their encouragement, patience and steadfast support but my mere expression of thanks likewise does not suffice. Without them the execution and completion of this work would not have been possible.

I would like to acknowledge the financial, academic and technical support of Visva- Bharati for their co-operation during my Ph.D work.
