Acknowledgements

I would like to express my sincere gratitude to my advisor and guide Dr. Shashikala Gurpur for the constant support, motivation and patience during my Ph.D tenure. Her guidance helped throughout the research and I could not have imagined having a better guide and mentor for my Ph.D study. This study would not have materialized without her patient guidance and kind and encouraging words.

My dream for a doctoral degree is been fulfilled with the constant support from my family, my parents, special mention to my husband and daughter. Without their support and encouragement this dream would not have come true.

The present topic was awarded CSIR- Senior Research Fellowship, letter annexed herewith. I am sincerely grateful to my former mentor, Dr. Raj Hirwani for extending his guidance at the initial phase of my study. He gave me direction and vision to complete the research work. Respondent-scientists and researchers also deserve a huge share of my gratitude, besides my colleagues at CSIR-NCL.

I would also like to thank Symbiosis International University for giving me this opportunity to complete my research work at their esteemed organization. It has indeed been a privilege to be associated with Symbiosis International University.
