

||| List of Tables |||

Table 2.1	Bisindolizines VI(a-h)	78
Table 2.2	Analytical data of bisindolizines VI(a-h).....	79
Table 2.3	Signal change produced by various metal ions in presence of Fe ³⁺	97
Table 2.4	Determination of Fe ³⁺ in pharmaceutical formulation.....	102
Table 2.5	Antibacterial activity of bisindolizine derivatives.....	104
Table 3.1	Different derivatives of cycl[3.2.2]azines [XII(a-h)]	114
Table 3.2	Analytical data of cycl[3.2.2]azines (XIIa-h)	115
Table 3.3	Signal change produced by various metal ions in the presence of Co ²⁺	131
Table 3.4	Determination of Co ²⁺ in pharmaceutical formulation.....	137
Table 3.5	Antibacterial activity of various cycl[3.2.2]azine derivatives.....	138
Table 4.1	Different derivatives of imidazo[1,2-a]pyridines (XVIa-h).....	145
Table 4.2	Analytical data of imidazo[1,2-a]pyridines (XVIa-h)	147
Table 4.3	Crystal data of (XVIg).....	152
Table 4.4	Bond lengths [Å] and bond angles [deg] for (XVIg)	153
Table 4.5	Signal change produced by various metal ions in presence of Fe ³⁺	167
Table 4.6	Determination of Fe ³⁺ in pharmaceutical formulation	172
Table 4.7	Results of screening of samples for antibacterial activity.....	173
Table 4.8	Minimum inhibitory concentration.....	174
Table 5.1	Different derivatives of 1-azacycl[3.2.2]azines (XVIII a-e).....	183
Table 5.2	Analytical data of 1-azacycl[3.2.2]azines (XVIII a-e)	184
Table 5.3	Signal change produced by various metal ions in presence of Co ²⁺	196
Table 5.4	Determination of Co ²⁺ in pharmaceutical formulation.....	200
Table 5.5	Zone of inhibition of various derivatives in mm.....	201
Table 5.6	Minimum inhibitory concentration.....	202
Table 6.1	Summary of work done	207
