1. Introduction.................................................................................. 1-49
   1.1. Development of children during specified age of 8 – 12 years...  1-3
   1.2. Importance of school for children........................................ 3
   1.2.1. School, enrolment, teacher and scholastic problems related indicators in children. 3-4
   1.2.2. Status of disadvantaged, rural and tribal schools and education........................................ 4-7
   1.3. Conceptual frame work: Child-friendly methods of intervention for total development of children........ 8-24
   1.4. Concepts considered for the present study............................. 24-45
   1.5. Origin of problem................................................................. 45-47
   1.6. Importance or relevance of present study............................... 47-49

2. Review of literature....................................................................... 50-99
   2.1. Influence of socio-economic-cultural disadvantage or deprivation on cognitive development............. 51-61
   2.2. Influence of socio-economic-cultural disadvantage or deprivation on psychosocial development......... 61-64
   2.1. Influence of gender on cognitive and psychosocial aspects................ 64-72
   2.2. Educational problems and status of schools at tribal areas.......... 72-75
   2.3. Play-way Intervention methods for cognitive and psychosocial development of children.................. 75-99

3. Research methodology..................................................................... 100-123

4. Results............................................................................................ 124-162
   4.1. Sample selection and sample characteristics............................ 127-128
   4.2. Prevalence of problem in the Ashrama school children.............. 129-131
   4.3. Pre-intervention (base line) comparison of experimental and control group on different assessment tools......... 132-134
   4.4. Pre-intervention (base line) scores and levels of the group on different assessment tools.......................... 135-138
   4.5. Comparison of the experimental (before and after intervention) and control (before and after waitlist period) group........ 139-147
4.6. Comparison of the experimental (after intervention) and control (after waitlist period) group ................................. 148-152
4.7. Effect size estimates of intervention programme outcome........ 153-156
4.8. Gender difference in experimental (before and after intervention) and control (before and after waitlist period) group on different assessment tools ........................................ 157-158
4.9. Relationship between attention, memory and intellectual ability among experimental (before and after intervention) and control (before and after waitlist period) group ........................................ 159-160
4.10. Relationship between adjustment, self concept and social problem solving skills among experimental and control group .. 161
5. Discussion .................................................................................. 162
5.1. Prevalence of problem in the Ashrama school as identified on children’s behaviour questionnaire ......................... 163-164
5.2. Pre-intervention (base line) comparison of the experimental and control group on different assessment tools .............. 165
5.3. Pre-intervention (base line) scores and levels on different assessment tools .......................................................... 166-182
5.4. Comparison of experimental group (before and after intervention) and control group (before and after waitlist period) by also considering effect size estimates on different assessment tools ........................................... 183-208
5.5. Gender difference comparison of the experimental and control group on different assessment tools .......................... 209-227
5.6. Relationship among cognitive and psychosocial aspects of experimental group and control group .......................... 228-229
6. Summary and Conclusions ................................................................. 230-238
Critical evaluation .................................................................. 239-243
Suggestions for further research .................................................. 244-245
Implications .................................................................................. 246-250
